Service Bulletin

Fuel Tank Replacement
Regarding Safety Recall 02V-083

Bulletin #:	IMCSB-038
Author:	D. Manternach
Rev:	A
Date:	03/28/02
Affected Models:	2002 Scout 2002 Spirit
VINs:	See attached

To all Indian dealers: ***Reference fax sent to you on 03/14/02.***

IMPORTANT NOTE: ***Federal law requires the dealer to complete the recall service prior to retail delivery of vehicles still in dealer inventory.***

The National Traffic and Motor Vehicle Safety Act, as amended, provides that each vehicle subject to a recall campaign of this type must be adequately repaired within a reasonable time after the owner has tendered it for repair. Failure to repair within sixty (60) days after tender of a vehicle is considered evidence of failure to repair within a reasonable time.

If the condition is not adequately repaired within a reasonable time, the owner may be entitled to an identical or reasonably equivalent vehicle at no charge, or to a refund of the purchase price less a reasonable allowance for depreciation.

As you will see in reading the attached copy of the letter that is being sent to owners, the owners are being instructed to contact the Indian Motorcycle Corporation customer service if their dealer does not remedy the condition within five (5) days of the mutually agreed upon service date. If the condition is not remedied within a reasonable time, they are instructed on how to contact the National Highway Traffic Safety Administration.

Purpose:

Instructions for removal and replacement of fuel tanks on 2002 Indian Spirit and Scout models.

Required Materials:

Qty 1, Fuel tank, left
Qty 1, Fuel tank, right
Qty 5, 96-776 4" Zip tie
Qty 2, 96-025, Crimp clamp
Qty 1, 26-453, Fuel hose, 5/16" x 7.5" long

Tools:

5/32"Allen wrench or socket
3/16"Allen wrench or socket

1/4 "Allen wrench or socket
Standard screwdriver
6" extension
½" socket
Ratchet
Dikes – cutters
Torque wrench
Gas can or caddy
Crescent wrench
TL42- thread lock
Teflon tape

Time Required: 1.1 hr

Procedure:

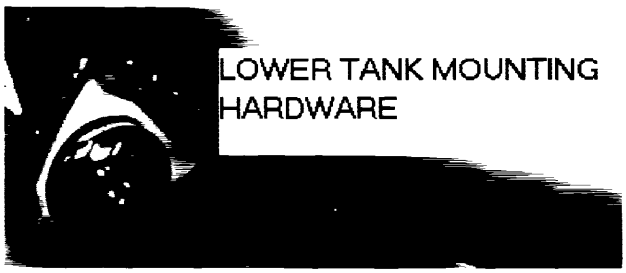
Note: *If you do not feel that you fully understand the instructions as outlined below, please do not hesitate to call Gary Andersen @408-846-7318.*

Remove existing tanks:

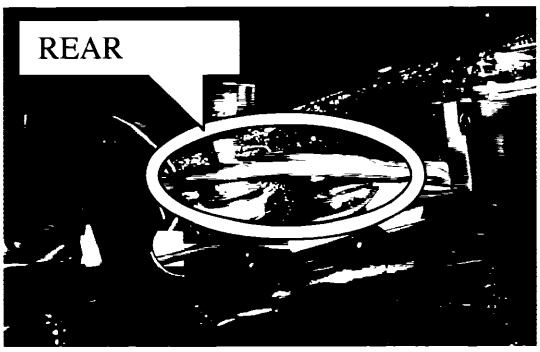
1) Properly support and secure vehicle.

WARNING!
Gasoline is flammable and explosive. Do not smoke or allow open flame near the work area. Failure to follow this warning may result in personal injury.

2) Place petcock in "OFF" position. Loosen hose clamp that secures fuel line to petcock and remove fuel line from petcock. Install a 5/16" hose approx 3 ft. in length on petcock so fuel can be drained into adequately sized, approved gasoline container.
3) Cut and remove lower crossover tube clamps. Remove crossover line
4) Remove upper and lower dash mount bolts. Raise dash and disconnect wiring harnesses to the dash. Remove dash.
5) Remove front lower tank mount fasteners.



6) Remove rear tank mount fasteners.
7) Remove the upper tank mount one at a time along with tank.



8) After tanks are removed, loosen tank mount brackets to allow adjustment for new tanks being installed

Make sure washers do not fall off front tank mounting bracket

9) Remove rubber grommets, petcock, upper crossover and fuel caps so they can be used on the replacement fuel tanks.

Installation of tanks:

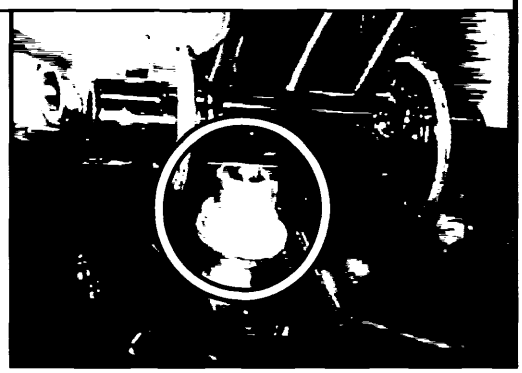
1) Install rubber grommets, petcock, upper crossover line and fuel caps on new fuel tanks.
2) Make sure washers did not fall off upper mounts or rear tank mount standoffs.

3) Prepare hardware by applying TL42 blue thread lock.
   - Install 1st tank
     - Start upper front bolt & rear bolt to hold tank
     - Start bottom front bolt.

- Install 2nd tank
  - Start upper front bolt & rear bolt to hold tank
  - Start bottom front bolt.

4) Check alignment of the tanks to each other vertically and horizontally. View the upper and lower tank grommets for distortion. Adjust the tank and/or mounts to eliminate the distortion.
5) Adjust and tighten as required. When finished, verify all 6 bolts are tightened and torque to:
   - Front top & bottom bolts: 19-23 ft-lbs
   - Rear bolts: 15-19 ft-lbs
6) Tighten tank mount brackets. Torque to 19-23 ft-lbs.

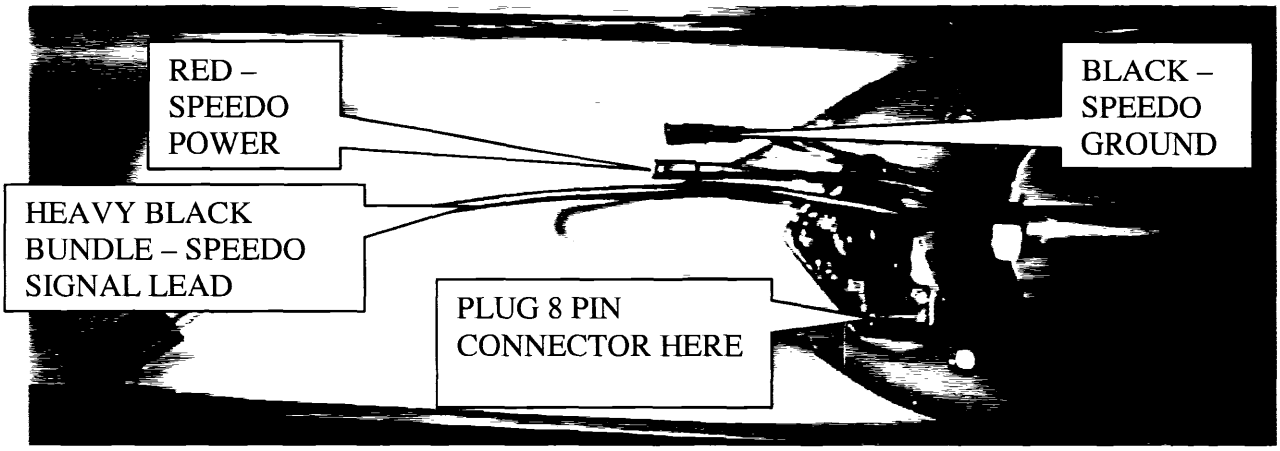
AFTER TANK MOUNTING SCREWS ARE TIGHT, TIGHTEN THE MOUNTING BRACKET BOLTS TO 19-23 FT LBS



7) Visually verify that the rubber grommets are not under stress.
8) Install new lower crossover hose (26-453) with provided crimp clamps (96-025, 157 CRIMP CLAMP).
9) Connect vent tube and tie to crossover tube with (96-776, 4" ZIP TIE)
10) Connect fuel line and tighten clamp to15 in-lbs.

Installation of dash:

1) Connect the black ground wire from the speedometer to one of two black ground wires attached to the frame.
2) Route the speedometer signal lead under the left side of the upper crossover tube, & plug it into the lead coming from the back of the fuel tank.
3) Connect speedometer power wire (red) to the red/blue wire from the auxiliary harness.
4) Push the 8 pin connector into the back side of the Speedometer. Note the connector orientation. When installed correctly the connector will fully engage the pins.



5) Tie speedometer power leads, speedometer signal lead, and the dash power lead together with zip-tie (96-776, 4" ZIP-TIE).
6) Route the dash wires on the left side of the front dash mount – BE SURE THE WIRES GO BELOW THE MOUNT SO THEY CAN'T BE PINCHED WHEN THE DASH IS INSTALLED.
7) Apply thread lock to the front dash mounting nut. Do not use thread lock on the rear bolt going into the nylon nut.
8) Place a ¼" A.N. washer on the front bolt & the ¼" flat washer on the rear bolt. Slip them through the dash mount holes and thread into the cage nuts. Tighten the front bolt, & run the rear bolt in until the dash is snug against the tank, but not bowed. Adjustment of the mounting nuts may be required. Check fitment of dash to both the left and right tanks. The dash should follow the contour of the tanks and compress the rubber molding strip.

Completion Reporting and Dealer Credit:

Dealers will be reimbursed for 1.1 hours of labor time at the dealer's labor rate.

Labor reimbursement will be paid only after proper "Dealer Response Card" is submitted

Claims are not required, parts will be sent automatically.

DO NOT return defective tanks to factory.

DO NOT dispose of defective tanks.

Indian Motorcycle Corp. will contact dealers with a return procedure at a later date.

March 19, 2002

Dear Indian Motorcycle Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR NOTICE

Indian Motorcycle Corporation ("IMC") has determined that a defect which relates to motor vehicle safety exists in 2002 Scout and Spirit models produced through March 8, 2002. The defect is in the design of the rear fuel tank mounting brackets. Fractures can occur at the top of the joint where the bracket is welded to the tank back plate, potentially allowing gas to escape from the tank.

WHAT YOUR INDIAN DEALER WILL DO

Your IMC dealer will replace your gas tanks with tanks that have a redesigned mounting bracket. This replacement will be performed without charge to you.

WHAT YOU SHOULD DO

Please contact your IMC dealer as soon as possible to arrange a service date so the dealer may install your new gas tanks. The time necessary to replace the gas tanks is about an hour. Please ask your dealer for additional information on scheduling this service for your bike and the anticipated delivery date of the new gas tanks.

Your IMC dealer is fully prepared to assist you. Please take your motorcycle to the dealer who sold it to you, as this dealer has been notified specifically that your motorcycle needs this service and is expecting your call. If you have moved, or your dealer is no longer in operation, please contact Julie Wood at IMC customer service at 1-408-846-7228. Also, if you take your bike in on the agreed service date and the gas tank is not replaced within five days, please call Julie Wood. If you have sold or traded your bike, please let us know by completing the postage paid reply card and returning it to us.

If after contacting your dealer and IMC customer service you still have not received the necessary service without charge within a reasonable amount of time, you may submit a written complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street S. W., Washington, D.C. 20590 or call 1-888-327-4236. (Washington D.C. residents use 1-202-366-0123.)

We here at Indian apologize for any inconvenience this has caused you. Please understand that we have sent you this notice because we care about your safety and the quality of our products. We urge you to get your bike serviced promptly.

Thank you for your attention to this important matter.

George Nobile, Vice President of Warranty and Customer Service

200 EAST TENTH ST. • GILROY, CALIFORNIA • U. S. A. 95020
