SAFETY RECALL NOTICE

May 7, 2012

Page 1 of 2

Dear Butler Trailer Owner:

This notice is sent to you in accordance of requirements of the National Traffic and Motor Vehicle Safety Act

Butler Trailer has decided that a defect, which relates to motor vehicle safety, exists in certain Butler trailers equipped with Dexter Axle electric/hydraulic actuators. This defect involves premature wear of some of the critical components of the pump in these actuators. This could result in the pump becoming inoperable which can cause loss of braking effort by the trailer, increasing the risk of a crash.

Your trailer has been identified as included in this recall. Please examine the electric/hydraulic brake actuator on your trailer by opening the kit box to see if it is one of the recalled units. The serial number can be found on the E/H actuator label. The affected ranges are as follows:

K71-650 (E/H 1000 psi)-serial # DTS 11903 to DTS 12759
K71-651 (E/H 1600 psi)-serial # DTS 13805 to DTS 14751

If the unit is in one of the affected ranges, please do not use your trailer until the unit has been replaced.

Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within 10 days. If you previously paid to have the actuator replaced, you may be eligible for reimbursement.

For additional information or to correct this issue:

Contact:Dexter Axle
Phone:1-800-400-2164
Hours:8:00am – 5:00pm Eastern Standard Time
