SAFETY RECALL NOTICE

Dear RICHARDSON TRUCKING

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Delta Mfg. Inc. has decided that a defect which relates to motor vehicle safety exists in Electric/Hydraulic (E/H) Actuators .

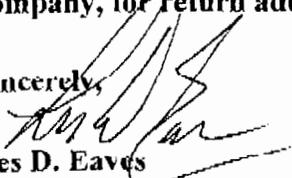

IMPORTANT

Your Electric/Hydraulic Actuator is being recalled.

You should contact your nearest dealer, return the item to us, attach the enclosed warning label.

Dexter Axle was notified by the supplier of the hydraulic pump used in their electric/hdraulic brake actuator that a quantity of these pumps had not been properly heat treated. This condition can cause premature wear of some critical components in these pumps which can render the unit inoperable. The electric/hydraulic brake actuator provides braking power to the trailer brakes. Failure of this actuator can result in the loss of braking effort by the trailer. You should notify Nuera Transports at (501)589-3311 with the serial number on the actuator to see if you have one of the defective units. Dexter axle will replace recalled actuators free of charge with actuator being returned to company, for return address contact (260) 636-5311.

Sincerely,

Les D. Eaves
Vice-President
