IMPORTANT SAFETY RECALL REMINDER

Ford Motor Company would like to remind you that your 2001 Ranger has not had the following no charge recall completed.

You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

**Recall Number
and Description:**

09S09 Safety Recall – Speed Control System Modification

What is the issue?

Ford cannot be confident that over many years in service, a speed control deactivation switch installed on your vehicle will not leak brake fluid, posing the risk of a fire. This condition may occur either when the vehicle is parked or when it is being operated. This risk exists on vehicles equipped with or without speed control.

Until you have the recall service performed, park your vehicle outdoors away from structures to prevent a potential fire from spreading.

**What will Ford and
your dealer do?**

Ford Motor Company has authorized your dealer to perform the repairs under this program on your vehicle **free of charge** (parts and labor).

What should you do?

Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access <http://www.FordOwner.com> for dealer addresses, maps and driving instructions.

The vehicle owner is responsible for having this service action performed. Ford Motor Company reserves the right to deny coverage for any vehicle damage that may result from failure to have this recall performed on a timely basis. Therefore, please have this recall performed as soon as possible.
