Subject: Update to Recall 13V-044 Repair Battery Cable

To: BMW Parts Managers, Service Managers, Shop Foremen,

This is a Parts and Service update regarding the E8x and E9x Recall to repair the battery cable connection.

- An initial quantity of 100 parts will be pushed to each center today.
- The quantity you receive from the push order should be used for any critical cases.
- The supply of parts remains limited; please place orders only as needed.
- Customer letters will begin mailing next week and will be staggered throughout the month.
- It is recommended that the customers not be scheduled unless you have the necessary parts at your location reserved for the VIN.
- Service Information bulletin B61 02 13 will be published later today on TIS. The SIB will contain all necessary Recall information. Special Tool bulletin B04 03 13 has already been published.
- Once bulletin B61 02 13 has been published, the current repair to replace the entire B+ cable will no longer be valid and B61 08 11 will be removed from TIS.

Sincerely,

Technical Service and Parts Logistics
