To All BMW Parts Managers

RE: Parts Information for Recall Campaign: 13V-044 Repair Battery Positive Cable

We would like to update you regarding the current parts situation for the above Recall Campaign:

- Parts are in transit to the US RDCs, when there are sufficient quantities, a push of an initial quantity will be made to each Center.
- The quantity you receive from the push order should be used for any critical cases.
- At this time the parts are blocked from ordering, we will keep you updated via DCS messages as new information from the supply side becomes available.
- The PTG does not have the capability to release these parts, please do not contact them for releasing of parts.

It is recommended that customers not be scheduled unless you have necessary parts at your location reserved for the VIN. Customer letters are scheduled to begin mailing March 8 and will be staggered over the next month.

Thank you for your continued patience as our inventory builds up to necessary levels.

Best regards,

Amy McNamara  
Logistics Operations Manager
