

SAFETY RECALL NOTICE

		
<p>Combi Coccooro Model Number: 8220 Manufacture Dates: 1/06/2009 – 12/05/2012</p>	<p>Combi Zeus Turn Model Number: 8815 Manufacture Dates: 7/15/2007 – 3/25/2009</p>	<p>Combi Zeus 360 Model Number: 8836 Manufacture Dates: 2/25/2009 – 5/24/2012</p>

Charlotte, NC, February 2014 - Combi USA, Inc. has decided that an individual component of the Coccooro, Zeus Turn, and Zeus 360 does not fully comply with Federal Motor Vehicle Safety Standard No. 213, Child Restraint Systems.

The Coccooro, Zeus Turn and Zeus 360 child restraints, when tested as a complete child restraint system, do fully comply with Federal Motor Vehicle Standard 213. Consumers are encouraged to continue use of the Coccooro, Zeus Turn and Zeus 360 child restraints while awaiting the remedy kit described below.

The webbing used on the harness of the affected child restraints has an embedded plastic button that keeps the buckle tongues from sliding into the recesses of the restraint. The webbing with the embedded plastic button, when tested independently from the child restraint system, does not meet the minimum breaking strength in accordance with Federal Motor Vehicle Standard No. 213. The embedded plastic button affects the overall strength of the seat belt assembly, and in turn could potentially affect the overall performance of the child restraint in the event of a crash.

Combi has received no reports of accidents or injuries. No other car restraint models are affected.

The affected child restraints should not be returned to the Combi retailer. Combi will provide a free remedy kit and detailed instructions to all owners beginning on or before February 6, 2014. To verify product registration and order a remedy kit online visit www.CombiUSA/Safety-Notifications/Recall-Information.aspx or call recall services at 1-844-697-1690. Consumers may continue use of the Coccooro, Zeus Turn and Zeus 360 child restraints while awaiting the remedy kit.
