

SAFETY RECALL # 15V-212 - Revised
(Expanded to include 7000 lb. axle hubs)

June 12, 2015

To: All Grand Design RV Dealers

Grand Design RV and Lippert Components have decided that a safety defect exists in certain 2015 & 2016 Reflection 303RLS fifth-wheel trailers, 308BHTS & 313RLTS travel trailers equipped with Lippert 5200# axles, and 2016 Solitude 375RE fifth-wheels equipped with 7000# axles. This recall was expanded to include 7000# axles June 10th.

The defect involves Reflection 303RLS, 308BHTS & 313RLTS vehicles with 5200# axles manufactured between March 12, 2015 and April 6, 2015. The VIN range affected is 573 [REDACTED] through 573 [REDACTED]. In addition, Solitude 375RE units manufactured between 4/30/15 & 5/7/15 with 7000# axles have been added to this recall. The VIN range is limited to serial numbers 573 [REDACTED] through 573 [REDACTED] units). Only the above models within this range are affected. Please refer the attached Lippert Axle Hub Stud Breakage Identification instruction form to identify defective hubs. On these specific hubs, the axle hub studs may shear or break. If the axle hub studs were to shear or break while the trailer is being towed the potential exists for wheel separation from the trailer. Should this occur there is the potential for loss of control of the vehicle which could result in a crash creating the possibility of injury or death.

Owners of affected vehicles will be notified of this recall by mail from Grand Design RV. If you have been shipped suspect vehicles you will find attached a list of retail sold and stock units affected by this recall. Please find attached the inspection, repair and claim filing instructions associated with this recall action.
