RE: New NHTSA Safety Recall #15E-061
Replaces NHTSA Safety Recall #14E-024

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. SAF-HOLLAND, Inc. has decided that a defect which relates to motor vehicle safety exists in certain CBX Series Suspensions, repair kits and loose bolts. This notice changes the pivot bolt safety recall (NHTSA Recall #14E-024) previously announced by SAF-HOLLAND, Inc. The date range of the recall has been expanded to include CBX Suspensions, repair kits and loose bolts shipped to your facilities between 20SEP13 and 08OCT13. The additional shipping days expand the original date range of 08OCT13 and 30NOV13.

The recall of the defective bolts we shipped between 20SEP13 and 30NOV13 has been assigned NHTSA Safety Recall #15E-061.

Description of Defect:

A revised total of 16,959 pivot bolts (SAF-HOLLAND part number 93201070) are being recalled due to possible cracks at the interface between the bolt head and the body of the bolt. The presence of a crack could result in separation of the bolt head and failure of a pivot bolt connection on one side of the axle/suspension assembly, resulting in the trailer becoming misaligned behind the tractor which will be immediately apparent to the driver.

If you are a vehicle original equipment manufacturer, we believe that you are required to file a revised Part 573 Vehicle Safety Defect Report within 5 days of receipt of this notification. Attached is a print copy of SAF-HOLLAND's revised Part 573 Equipment Safety Recall Report, that supercedes and incorporates the information contained in previous Part 573 Reports SAF-HOLLAND had submitted to NHTSA. The updated Part 573 Report information was submitted on 15JUL15 using the NHTSA recall portal at www.safercar.gov.

A detailed list of all CBX Series Suspensions, repair kits and loose affected by NHTSA Recall #15E-061, that were shipped to you between 20SEP13 and 30NOV13 is attached. This list includes information about the shipments from us including your purchase order number and it indicates if our records show that the defective bolt(s) had already been replaced as of 30JUN15.

If after receipt of a CBX Suspensions on the attached list, you modified the suspension using our Posilift Air Lift Kit to make one of the axles a lift axle, the pivot bolts in the modified axle are not covered by this recall. The Posilift Air Lift Kits use a different bolt (93201072) than the bolt that is the subject of this recall.

It is not uncommon in vehicle recalls involving defective or noncomplying original equipment, particularly those involving specialty or commercial vehicle applications, for the vehicle manufacturer and the original equipment manufacturer to coordinate such that the original equipment manufacturer performs the repairs and reports the numbers of vehicles remedied to NHTSA in quarterly reports. No matter what arrangements are made, however, ultimate responsibility for performance of the recall campaign remains with the vehicle manufacturer. The responsibility for notifying owners is not delegable and remains with the vehicle's manufacturer.

We will, at your request, assist you in conducting the recall to the fullest extent allowed by law or regulation. We apologize for any inconvenience this recall causes you and your vehicle customers.

Please be assured that SAF-HOLLAND's primary concern is to provide the highest quality products for the transportation industry resulting in the upmost safety for our customers and end users.

If you require additional information or assistance in completing your Part 573 report, please contact me directly at (231) 777-4302 or contact John Johnson, Director Customer Service, (231) 777-4369.

If after contacting us, you are still not satisfied that we have done our best to remedy this condition without charge and within a reasonable time, you may wish to write the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590, or call the toll-free Vehicle Safety Hotline at 1.888.327.4236 (TTY 1.800.424.9153), or go to <http://www.safercar.gov>. The National Highway Traffic Safety Administration Campaign ID Number for this recall is 15E-061.

Sincerely,
SAF-HOLLAND, Inc.
