HERCULES TIRE RECALLING CERTAIN SIZES OF ALL TRAC A/T TIRES

Hercules Tire has determined that the tires described above, if affected by the defect, can experience in-service tread separations. Should a separation occur in your tire, you could lose control of the vehicle without warning, which could possibly result in a vehicle crash. As a result, Hercules Tire is recalling all tires within the size and serial number ranges shown above.

If you believe that the tires described above are installed on your vehicle, please visit your Hercules Tires dealer as soon as possible to inspect the tires to determine if they are part of the recall. If the dealer's inspection verifies that you have a tire or tires within the affected range, the tire or tires will be replaced, mounted and, if needed, balanced at no charge to you.

It is expected that replacement tires will be available at the time of the inspection and if Hercules replacement tires are not available at the time of inspection, they will be replaced by another comparable tire brand using the same size and load rating as required by the vehicle manufacturer. The replacement will be performed at no cost to you.

For more information about the recall and how you may be able to obtain replacement tires, call the Hercules recall service center at 1-888-943-2402. We will attempt to be of service to you.

We regret this inconvenience. We at Hercules Tire are committed to the highest standards of safety and product quality, and our interest is in your safety and satisfaction with your tires.
