Alexander,

Our records indicate that we purchased four refrigerators of the model numbers in question in the time periods indicated. None of the refrigerators were installed by us or, if installed by others, were not installed as original equipment. We have no way of finding out who may own them now as, if installed, they were installed by other people in used vehicles and we have no records of vehicle identification numbers and have no reason to keep such records. We do not know which vehicles they may have been installed in anyway. This is all the information we have on these refrigerators.
