Subject: 2-door dometic refrigerators for Travel Lite, Inc.

Alex,

I have checked our records for these refrigerators, and can only find that we purchased 2 of these refrigerators during the time span listed for the recalled units. We did not have serial numbers listed on any of our paperwork for these refrigerators, so we contacted the dealer and had him look them up. Both of these were purchased at the end of 2005 and have serial numbers that begin with 921. According to the information sent to us on the recall, the last numbers in the recall begin with 639. Due to this,

Larry Johns has asked me to inform you that to the best of our knowledge, we think we didn't get any of the refrigerators that have defective units in them.

Regards,
Gidget Hightshoe
