Summary On September 6, 2007 Keystone RV Company notified NHTSA (07V-411) that certain Irvine Shade & Door glass shower doors with towel bars could break if pressure is applied to the towel bar. The risk of glass breakage can result in personal injury. Keystone stated that vehicles produced between October 19, 2006 and July 26, 2007 were affected. On December 4, 2008 Coachmen RV notified NHTSA (08V-639) that Coachmen vehicles produced between June 15, 2001 and August 6, 2007 also contained this equipment.

It is unknown how many other vehicle manufacturers have received these glass shower doors produced by Irvine Shade & Door. This investigation is being opened to obtain a list of other vehicle manufacturers that were sold this equipment and to request Irvine Shade & Door to submit the proper 573 Defect Information Report per 49 CFR §573.3 (f) should they agree this equipment is defective.
