Dear Volvo Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

In December 2006, a letter was sent to eligible vehicle owners announcing a Safety Recall on the Electronic Throttle System Software. Our records indicate that this important safety recall has not been completed on your vehicle. Please schedule an appointment at your local authorized Volvo retailer as soon as possible to have this important safety recall performed at no charge.

The reason for this Recall Campaign:

- MY2002 Volvo S60 and V70 with naturally aspirated engines (Not Turbocharged)

In certain of the involved vehicles, a combination of throttle positioning sensor irregularities, a dirty throttle housing, and/or inefficient software calibration may cause the onset of limp home modes without warning. In certain traffic situations, this condition could cause an unsafe situation and possibly a crash.

The corrective action is to have the current electronic throttle system software upgrade installed onto the involved vehicles.
