

TI Instruction Sheet

EvoBus

No. 67.10U06585A – S417 USA Fit the emergency exit
(Emergency Exit instruction....) adhesive sign conform to
standard

Note

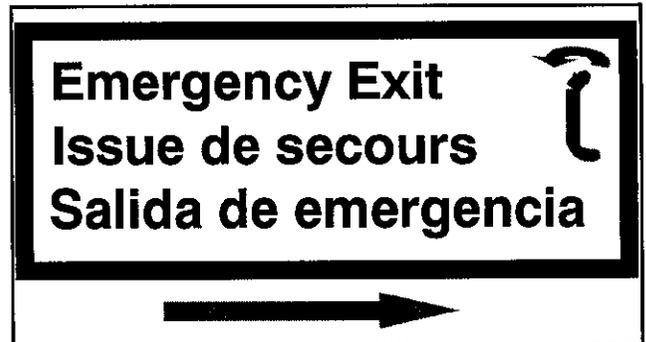

The positioning changes depending on the seat
arrangement.

- The signs are only necessary in the area of an
emergency exit window
- A sign must be fitted when the passenger area is
located within ≥ 15 inches of an emergency exit
window

No additional sign is necessary when the emergency
handle can be seen directly.

The additional signs must also be in the field of
view for standing passengers.

Additional sign for the
emergency handle position

TI Instruction Sheet

EvoBus

No. 67.10U06585A – S417 USA Fit the emergency exit (Emergency Exit instruction....) adhesive sign conform to standard

Before sticking on the sign, remove older emergency exit stickers

Attention! Don't remove the label for usage of emergency exit!

Then the pane in the area of the stickers must be cleaned and de-greased.
Use standard window cleaner for this purpose.

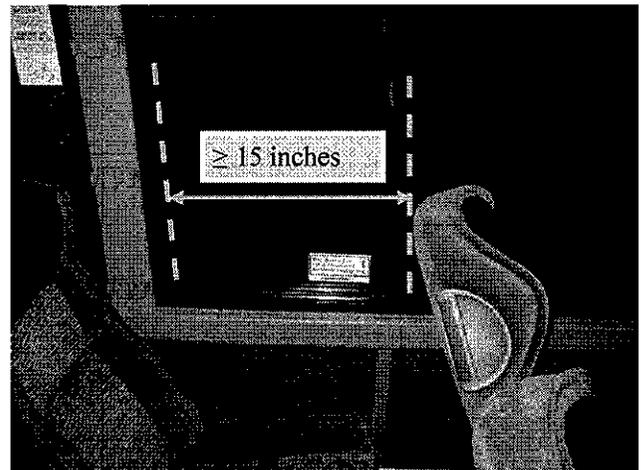

Do not remove!

1. Check if an additional sign has to be stuck on, in the driving direction, left side:

An additional sign must be stuck on if the passenger area is larger than 15 inches.

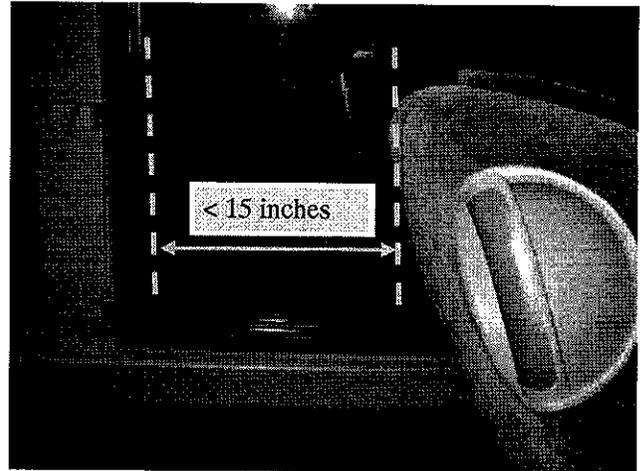

TI Instruction Sheet

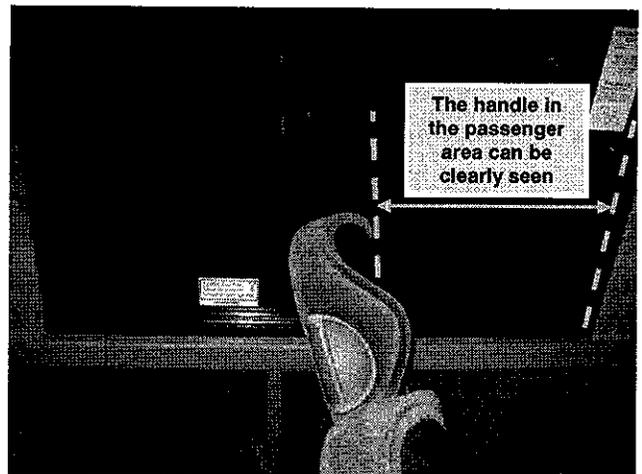

EvoBus

No. 67.10U06585A – S417 USA Fit the emergency exit
(Emergency Exit instruction....) adhesive sign conform to
standard

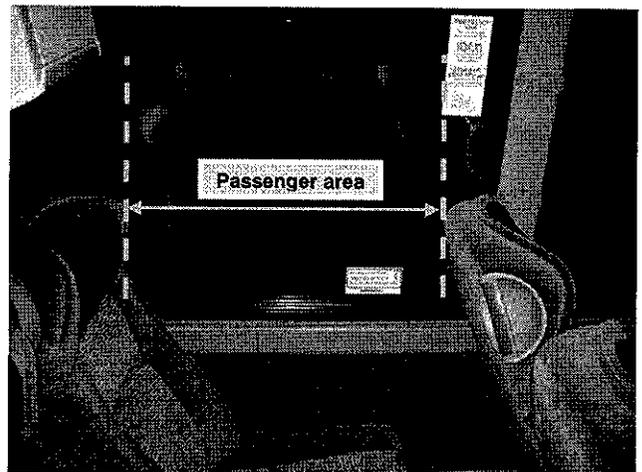

An additional sign does not have to be stuck on if
the passenger area is smaller than 15 inches.

The handle can be clearly seen. No additional sign
is required.
