SAFETY RECALL 51101-C

September 2010

Dear Workhorse Customer:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Workhorse Custom Chassis (Workhorse) has decided that a defect which relates to motor vehicle safety exists in the Bosch service brake calipers installed on certain W20, W21, W22 and W22D motor home chassis built from July 24, 2000, through August 2, 2010.

REASON FOR THIS RECALL

The pistons inside the Bosch service brake caliper may stick in the applied position. If this were to occur, the service brakes may overheat - which may result in damage to other brake components and possibly lead to brake fluid boiling.

RISK TO MOTOR VEHICLE SAFETY

If the conditions described above were to occur, the performance of the service brakes may be reduced and the brake pedal may feel "soft" or "spongy." Anticipated braking distance may also increase which may result in a crash that may cause property damage, personal injury, or death.
