The Office of Defects Investigation (ODI) of the National Highway Traffic Safety Administration has received Trailmobile, Inc.'s quarterly report for the quarter ending September 30, 2001, as required under Federal Regulation 49 CFR Part 573.6. The following safety recall campaign is being reviewed:

**00V-102.001:** involving 94 cargo van trailers equipped with ConMet pregreased trailer axle hubs. The outboard bearing on the PreGreased trailer axle hubs used with the tire inflation systems may fail due to the intrusion of contaminants through the tire inflation system.

In the third quarter of 2001, (Trailmobile's fourth quarterly report) Trailmobile reported a completion rate of 16%. ODI is concerned about the low completion rate reported for this recall campaign and would like to see a meaningful increase in future reporting quarters.
