RE: NHTSA Campaign ID No.: 06V222000

RECEIVED
MVS-215
2006 JUN 30 P 2:54
OFFICE OF
DEFECTS INVESTIGATION

Dear Mr. Person:

This letter is for the purpose of advising you of our estimated schedule for sending notifications to owners, dealers and distributors regarding the above referenced campaign.

We anticipate having an adequate supply of replacement parts to begin owner notification on or about September 1, 2006. We are waiting for confirmation from one of our key vendors that it will be able to supply our initial order, which has already been placed. Our vendor is aware that we are conducting a safety recall and it has stepped up its production to meet our order and is treating this matter as a high priority.

We understand the requirement to provide your staff with a draft owner notification letter no less than five days before mailing the letter to customers. We will provide your staff with a draft for review.

We are planning on sending a preliminary notice to our dealers within the next 10 days. As the details of the repair procedure are still under development, we anticipate supplementing this notice to provide details prior to the actual implementation of the recall. A representative copy of each such dealer notification will be provided to your office within five days after it is sent, in accordance with your regulations.

Sincerely,

David Gannon
Director of Service
