

# Safety Recall ALERT

**Date:** November 21, 2007 **Number:** SRA-07-05  
**To:** All U.S. & Canadian Distributors  
**Attention:** Service Manager, Warranty Manager, Parts Manager, Dealer Principal  
**From:** Regulatory Affairs Department  
**Subject:** Safety Recall, RVXX0705, SAF Holland Simplex Fifth Wheel

**Safety Recall Summary:**

On certain Volvo VHD, VNL, VNM, and VT model vehicles manufactured from January 2006 through July 2007, there exists the potential that the lever arm pivot bolt may have been over-tightened. An over-tightened pivot bolt can distort the pivot bolt spacer sleeve, which may prevent the fifth wheel latch jaw from closing and latching securely around the trailer king pin.

The number of vehicles affected is approximately 6,765 (6,706 US and 59 Canada).

**Dealer's Responsibility:**

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act requires dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

**Release Schedule:**

- Repair Instructions are tentatively scheduled for release no later than January 7, 2008.
- Vehicle list is tentatively scheduled to be posted on the Trucks Dealer Portal November 21, 2007.
- Owner Notices are scheduled to be mailed on or before January 14, 2008.

**Questions:**

Contact the Regulatory Affairs Department at [vtna.regulatoryaffairs@volvo.com](mailto:vtna.regulatoryaffairs@volvo.com) if you have questions.
