Long Dog Enterprise INC. was advised by Dometic LLC, that a number of their Dometic Refrigerators were on recall due to a possible fatigue crack that may develop in the boiler tube over time. We took a look at our inventory and the single unit that was sold to our salesman and did find one of the refrigerators that fell into one of the recall units. Due to the fact that the coach is in our inventory we have ordered the kit that Dometic is providing to fix the problem. We will have the refrigerator fixed before the sale of the coach.
