Chris,

As per our phone discussion this afternoon, please provide updates to Requests 1 through 5 from the information request letter for PE10-034, with the following revisions:

Subject vehicles: 2009 through 2011 Volkswagen and Audi vehicles equipped with TDI clean diesel engines (i.e., all models identified in the VW technical service bulletins related to vehicles with symptoms of fuel system damage related to high-pressure fuel pump failure).

For request #5 (warranty claims), please provide all claims related to the high-pressure fuel pump and provide VW's assessment of the approximate number or percentage that (1) relate to the subject condition and (2) involve an engine stall event.

Also, please provide an electronic file with a spreadsheet summary of all vehicles for which VW has collected fuel samples to date, including reference numbers for all related field reports.

Please provide this information by April 4, 2011. Please call if you have any questions.

Best regards,  
Jeff Quandt
