Subject: Recall Campaign 12V-008: Electric Auxiliary Water Pump

Recall letters are being mailed this week to owners of MINIs equipped with the N14 and N18 engine, produced from 11/2006 to 1/2011. All vehicles affected by this recall are identified via the Key Reader or DCS campaign inquiry. The Recall involves replacement of the electric auxiliary water pump for the turbocharger. Service Information bulletin M17 02 12 provides details on replacing the pump.

Parts should only be ordered in small quantities as needed; large orders will be cancelled. Please avoid overstocking of the Recall part numbers.
