THIS SERVICE CONTRACT (“Agreement”) IS DESIGNED SOLELY TO AFFORD THE PURCHASER WITH REASONABLE REPAIR OR REPLACEMENT OF THE LISTED PARTS TO THE DESCRIBED VEHICLE. IT IS NOT A CONDITION OF THE SALE OR FINANCING OF THE VEHICLE.

NISSAN EXTENDED SERVICES RESERVES THE RIGHT TO ACCEPT, CORRECT, MODIFY, OR REFUSE ANY CONTRACT APPLICATION. CLAIMS WITHIN THE FIRST 90 DAYS AND/OR 3,000 MILES OF THE EFFECTIVE DATE ARE SUBJECT TO REVIEW AND/OR DENIAL FOR A PRE-EXISTING CONDITION. 1 HOW THIS SERVICE AGREEMENT (“Agreement”) PROTECTS YOU

In return for your payment, Nissan Extended Services North America, GP (NESNA)*, will arrange for payment of the cost to repair or replace all covered parts of the described vehicle when such repair or replacement is due to a “MECHANICAL BREAKDOWN,” as defined below, and when all other terms and conditions of this Agreement are met. The deductible which you must pay is listed in the Vehicle/Agreement Information section of this Agreement.

MECHANICAL BREAKDOWN means the inability of a covered part(s) to perform the function(s) for which it was designed, due solely to defects in materials or faulty workmanship. MECHANICAL BREAKDOWN does not include damage due to negligence, damage caused by an accident, or the gradual reduction in operating performance due to wear and tear. In addition, this Agreement does not provide any benefit for any mechanical failure/breakdown caused by a non-covered part, or to a non-covered part.

*NESNA indicates Nissan Extended Services North America, GP, P.O. Box 685004, Franklin, TN 37068-5004, Telephone: (615) 725-1000.

2 WHAT IS COVERED AND FOR HOW LONG

This QualityGuard+Plus Agreement covers the cost of repairs and the replacement of covered parts due to a MECHANICAL BREAKDOWN. Replacement of any part may be made with a part of like kind and quality (LKQ). MECHANICAL BREAKDOWN coverage begins when your New Vehicle Limited Warranty, if any, expires. Other coverage, such as towing, begins on the date listed on this Agreement. Therefore, this Agreement may cover you for a portion of the same period as the original New Vehicle Limited Warranty provided with your vehicle when new. The New Vehicle Limited Warranty is the warranty provided by the original manufacturer of your vehicle. MECHANICAL BREAKDOWN and towing coverage continues until the expiration of this Agreement. Refer to the Vehicle/Agreement Information section of this Agreement for details relating to the expiration of this Agreement.

Odometer Reading, which appears in the Vehicle/Agreement Information section of this Agreement, means the actual number of miles which the vehicle has been operated since manufacture as indicated on the vehicle’s odometer, unless the odometer is/has been broken, has been replaced or has been tampered with. In such a situation, NESNA will calculate the total actual number of miles of vehicle operation since manufacture based on the information available. If ever the odometer is tampered with, and/or is inoperable so that the vehicle’s total actual number of miles of operation since manufacture cannot be accurately determined by NESNA, this Agreement will be void.

This Agreement covers any repairs needed due to MECHANICAL BREAKDOWN, as defined above, for components in the following categories:

**ENGINE:**

- Cylinder block, cylinder head, timing cover, valve cover and oil pan are only covered

THIS SERVICE CONTRACT ("Agreement") IS DESIGNED SOLELY TO AFFORD THE PURCHASER WITH REASONABLE REPAIR OR REPLACEMENT OF THE LISTED PARTS TO THE DESCRIBED VEHICLE. IT IS NOT A CONDITION OF THE SALE OR FINANCING OF THE VEHICLE.

NISSAN EXTENDED SERVICES RESERVES THE RIGHT TO ACCEPT, CORRECT, MODIFY, OR REFUSE ANY CONTRACT APPLICATION. CLAIMS WITHIN THE FIRST 90 DAYS AND/OR 3,000 MILES OF THE EFFECTIVE DATE ARE SUBJECT TO REVIEW AND/OR DENIAL FOR A PRE-EXISTING CONDITION. NISSAN EXTENDED SERVICES RESERVES THE RIGHT TO REJECT ANY APPLICATION OR CONTRACT FOR ANY REASON AT ITS DISCRETION UPON RETURN OF THE FULL AMOUNT PAID.

1 HOW THIS SERVICE AGREEMENT ("Agreement") PROTECTS YOU

In return for your payment, Nissan Extended Services North America, GP (NESNA)*, will arrange for payment of the cost to repair or replace all covered parts of the described vehicle when such repair or replacement is due to a "MECHANICAL BREAKDOWN," as defined below, and when all other terms and conditions of this Agreement are met. The deductible which you must pay is listed in the Vehicle/Agreement Information section of this Agreement.

MECHANICAL BREAKDOWN means the inability of a covered part(s) to perform the function(s) for which it was designed, due solely to defects in materials or faulty workmanship. MECHANICAL BREAKDOWN does not include damage due to negligence, damage caused by an accident, or the gradual reduction in operating performance due to wear and tear. In addition, this Agreement does not provide any benefit for any mechanical failure/breakdown caused by a non-covered part, or to a non-covered part.

*NESNA indicates Nissan Extended Services North America, GP, P.O. Box 685004, Franklin, TN 37068-5004, Telephone: (615) 725-1000.

2 WHAT IS COVERED AND FOR HOW LONG

This QualityGuard+Plus Agreement covers the cost of repairs and the replacement of covered parts due to a MECHANICAL BREAKDOWN. Replacement of any part may be made with a part of like kind and quality (LKQ). MECHANICAL BREAKDOWN coverage begins when your New Vehicle Limited Warranty, if any, expires. Other coverage, such as towing, begins on the date listed on this Agreement. Therefore, this Agreement may cover you for a portion of the same period as the original New Vehicle Limited Warranty provided with your vehicle when new. The New Vehicle Limited Warranty is the warranty provided by the original manufacturer of your vehicle. MECHANICAL BREAKDOWN and towing coverage continues until the expiration of this Agreement. Refer to the Vehicle/Agreement Information section of this Agreement for details relating to the expiration of this Agreement.

Odometer Reading, which appears in the Vehicle/Agreement Information section of this Agreement, means the actual number of miles which the vehicle has been operated since manufacture as indicated on the vehicle’s odometer, unless the odometer is/has been broken, has been replaced or has been tampered with. In such a situation, NESNA will calculate the total actual number of miles of vehicle operation since manufacture based on the information available. If ever the odometer is tampered with, and/or is inoperative so that the vehicle’s total actual number of miles of operation since manufacture cannot be accurately determined by NESNA, this Agreement will be void.

This Agreement covers any repairs needed due to MECHANICAL BREAKDOWN.

** Unlimited Mileage

*** 10 Years/ Unlimited Mileage on Seat belts
Both Infiniti and your Infiniti dealer are dedicated to serving all your automotive needs. Your complete satisfaction is our primary concern. Your Infiniti dealer is available to assist you with all your automobile sales, parts and service requirements.

If, however, a situation arises that you believe has not been addressed to your satisfaction, we ask that you take the following steps.

**STEP 1:**
Discuss the situation with the dealership management. If a problem still exists, contact the dealership’s owner. Your Infiniti dealer is best equipped to resolve the matter for you.

**STEP 2:**
If the concern has still not been addressed to your satisfaction, please contact our Infiniti Consumer Affairs Department using our toll free number:

1-800-662-6200

The Consumer Affairs Department will ask for the following information:

- Your name, address, and telephone number
- Vehicle identification number (on dashboard and permanent Infiniti Total Ownership program card)
- Date of purchase
- Current odometer reading
- Your Infiniti dealership’s name
- Details of the concern

Or you can write to Infiniti with the above information at:

INFINITI DIVISION
Nissan North America, Inc.
Consumer Affairs Department
P.O. Box 47038
Gardena, CA  90247-6838

**STEP 3:**
In the event that you believe Infiniti has been unable to satisfactorily address the problem, a special automotive complaint resolution program called AUTO LINE is available to you. The AUTO LINE program is independently operated by the Council of Better Business Bureaus, Inc. (BBB).

For information about the BBB AUTO LINE in your area, please call us (Infiniti) at the same toll free number (1-800-662-6200). We will be happy to provide you with the address and phone number of your local BBB office or any other information about AUTO LINE.

Or you may contact the BBB at:

AUTO LINE
Council of Better Business Bureaus, Inc.
4200 Wilson Blvd.
Arlington, Virginia  22203
1 (800) 955-5100

If you call, the BBB staff will record the details of your complaint by telephone. They will ask for the same information as in Step 2.

The AUTO LINE program consists of two parts: mediation and arbitration. The AUTO LINE Staff will attempt to provide suggestions for resolving the problem during mediation. If a satisfactory resolution has not been achieved during mediation, you will have the opportunity to present your case personally before an impartial person or three person panel. This is the arbitration part of AUTO LINE. The arbitrator(s) will make a decision after the arbitration hearing.
The BBB must send you a final decision in your case within forty (40) days (plus 7 days, if you have not contacted Infiniti) unless you delay the process. If you accept the decision, it will be legally binding on you and Infiniti. If you do not accept the decision, it will not be legally binding on you or Infiniti. However, in some states, if the decision is not accepted, it may be introduced either by you or by Infiniti as evidence in a subsequent court action.

Use of BBB AUTO LINE is generally completely voluntary. However, some states may specify that complaint resolution systems such as AUTO LINE that are sponsored by the manufacturer or distributor, and that comply with certain Federal regulations, must be used before you may use their state-operated complaint resolution systems or before you may file a lawsuit, or have certain other rights provided you by state law. In those states, Infiniti requires you first to apply to and utilize Auto Line in good faith prior to using those other remedies which may be available to you.

AUTO LINE may not be available in all states. We, Infiniti, can provide you with information about the availability of AUTO LINE in your state, or call the AUTO LINE number listed above.

ELIGIBILITY: Infiniti vehicles less than four years old from date delivered to the first retail buyer or otherwise put into use, and with fewer than 60,000 miles, are eligible for the program.

ASSISTANCE OUTSIDE OF WARRANTY
In support of our commitment to the “Total Ownership Experience,” Infiniti may occasionally offer to pay or reimburse for part or all of the cost of making certain, specific repairs beyond or outside of the terms of the warranty for some specific vehicle models. (Some states refer to such programs as “adjustment programs”). In such circumstances Infiniti mails notices to all known registered owners of affected vehicles. You may additionally inquire of your authorized Infiniti dealer or of Infiniti directly at the number listed below of the applicability of such programs to your vehicle.

Infiniti may occasionally offer special assistance that may pay for part or all of vehicle repairs beyond the expiration of the limited warranty period on a case by case basis. Should you experience unusual difficulties with your vehicle please discuss the situation with your dealer. If your dealer is unable to assist you, you may call the Infiniti Consumer Affairs Department at 1-800-662-6200 to discuss your concern. You will need to provide the Model, Model Year, VIN (Vehicle Identification Number), mileage, maintenance history, a detailed explanation of the concern, and why you believe that Infiniti should be responsible for the repair. Your request will be individually investigated and you will be informed of Infiniti’s decision.

Please also review the “Supplement to the 2004 Infiniti Warranty Information Booklet & 2004 Owner’s Manual” for important information concerning consumer rights in your state.

2004 INFINITI CALIFORNIA VEHICLE EMISSION CONTROL WARRANTIES*

The following statement is required to be provided by regulations of the California Air Resources Board.

YOUR WARRANTY RIGHTS AND OBLIGATIONS

The California Air Resources Board is pleased to explain the emission control system warranty on your 2004 vehicle. In California, new motor vehicles must be designed, built and equipped to meet the State’s stringent anti-smog standards. Nissan must warrant the emission control system on your vehicle for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your vehicle.

Your emission control system may include parts such as the fuel-injection system, the ignition system, catalytic converter and engine computer. Also included may be hoses, belts, connectors and other emission-related assemblies.

Where a warrantable condition exists, Nissan will repair your vehicle at no cost to you including diagnosis, parts and labor.

MANUFACTURER’S WARRANTY COVERAGE

For 4 years or 60,000 miles (whichever occurs first):

1) If your vehicle fails a Smog Check inspection, all necessary repairs and adjustments will be made by Nissan to ensure that your vehicle passes the inspection. This is your emission control system PERFORMANCE WARRANTY.

2) If any emission-related part on your vehicle is defective, the part will be repaired or replaced by Nissan. This is your short-term emission control system DEFECTS WARRANTY.

For 7 years or 70,000 miles (whichever occurs first):

If an emission-related part listed in this warranty booklet specially noted with coverage for 7 years or 70,000 miles is defective, the part will be repaired or replaced by Nissan. This is your long-term emission control system DEFECTS WARRANTY.

OWNER’S WARRANTY RESPONSIBILITIES

As the vehicle owner, you are responsible for the performance of the required maintenance listed in your Owner’s Manual. Nissan recommends that you retain all receipts covering maintenance on your vehicle, but Nissan cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

You are responsible for presenting your vehicle to an Infiniti dealer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.

As the vehicle owner, you should also be aware that Nissan may deny you warranty coverage if your vehicle or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.

If you have any questions regarding your warranty rights and responsibilities, you should contact Infiniti’s Consumer Affairs Department at 1-800-662-6200 or the California Air Resources Board at 9528 Telstar Avenue, El Monte CA 91731.

* These warranties apply to all California emission 2004 Infiniti vehicles sold for registration as new vehicles in California, Massachusetts or Vermont only.

EMISSIONS PERFORMANCE WARRANTY

WHEN DOES THIS WARRANTY APPLY
This warranty applies to your 2004 Infiniti vehicle only if it fails to pass a California “smog check” test or equivalent.

WHAT IS COVERED AND FOR HOW LONG
Nissan* warrants that if your vehicle fails to pass a California “smog check” test, it will make the necessary repairs so that your vehicle will pass. This warranty is for 4 years or 60,000 miles, whichever occurs first. The warranty begins the date the vehicle is delivered to the first retail buyer or the date it is first put in to service, whichever is earlier.

Exceptions to this warranty are listed below under the caption “WHAT IS NOT COVERED.”

WHAT IS NOT COVERED
These warranties do not cover:
1. Normal maintenance, service and parts replacement as outlined in the emission control maintenance instructions of your Owner’s Manual.
2. Failures directly as a result of:
   • Lack of performance of required emission control maintenance as outlined in your Owner’s Manual.
   • Misuse, accident or modification.

   • Improper adjustment or installation of parts during the performance of maintenance (non-warranty) services.
   • Tampering with or disconnecting any part affecting vehicle emissions.
   • The use of fuel other than that specified in your Owner’s Manual or fuel with contaminants which the fuel filter is not designed to remove.

3. In the case of the Performance Warranty, the use of any non-Nissan part not certified in accordance with Federal requirements which is defective or not equivalent from an emissions standpoint to the original equipment part.
4. In the case of the Defects Warranty, parts not supplied by Nissan or damage to other parts caused directly by non-Nissan parts.
5. In the case of the Performance Warranty, costs of determining the cause of a vehicle failing a California “smog check” test if such failure is found not to be covered.

LIMITATION OF WARRANTIES AND OTHER WARRANTY TERMS AND STATE LAW RIGHTS

EXTRA EXPENSES - LIMITATIONS OF DAMAGES
These emissions warranties do not cover incidental or consequential damages such as loss of the use of the vehicle, inconvenience or commercial loss.

ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE SHALL BE LIMITED TO THE DURATION OF THESE WRITTEN WARRANTIES.

Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. These warranties give you specific legal rights, and you may also have other rights which vary from state to state.

Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

(Cont’d next page...)
WHAT YOU MUST DO
In order to obtain warranty service you must deliver the vehicle to any authorized Infiniti dealer in the United States at your expense. You are responsible for the required maintenance on your vehicle as outlined in the maintenance instructions in your Owner's Manual. Nissan recommends that you retain all receipts covering maintenance on your vehicle, but Nissan cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

WHAT NISSAN WILL DO
Warranty repairs will be made at no charge for parts and/or labor, including diagnosis and tax. Any needed parts replacement will be made using new or remanufactured parts.

OTHER WARRANTY TERMS
PERFORMANCE WARRANTY CLAIMS PROCEDURE
You may make a claim under the Performance Warranty immediately after the failure of a "smog check" test. You must provide proof of this failure when making your claim in order to avoid additional "smog check" test charges.

You will be told whether Nissan will honor your claim within 30 days of the date you make the claim, unless a shorter time period is required by law. If your claim is denied, Nissan will notify you in writing of the reason. If we do not notify you within this time period, we will repair your vehicle under this warranty at no cost to you. The time period for notification will not apply if you request a delay or a delay is caused by events not under the control of Infiniti dealers.

No claim will be denied under the Performance Warranty because you use a certified part for maintenance or repair.

MAINTENANCE SERVICE AND REPLACEMENT PARTS
Important information concerning maintenance service and replacement parts is on page 14 of this booklet. No warranty claim will be denied solely because a non-Nissan part was used for maintenance or repair.

CALIFORNIA VEHICLE INSPECTION PROGRAM
Under this program, if your vehicle fails a "smog check" test, you may choose to have diagnosis of the failure and repairs made at an Infiniti dealer or at another service facility. If the inspection failure is the result of a condition covered by these warranties, you must take your vehicle to an Infiniti dealer for warranty repairs. This includes parts, labor and diagnosis. You must pay for diagnostic costs if performed at another service facility except in the case of emergency repairs as outlined below.

You must pay for all diagnostic and repair costs of an inspection failure as required by law if the failure was caused by conditions not covered by these warranties. If the failure is the result of a combination of conditions, you must pay for only the diagnostic and repair costs related to items not covered by these warranties.

After the 4 years/60,000 mile performance warranty has passed, a "smog check" test failure due to a defect in a part which is warranted for 7 years/70,000 miles is covered.

EMERGENCY REPAIRS
In case of an emergency, when an authorized Infiniti dealer is not reasonably available, warranty repairs may be performed at any service facility or by the owner using any replacement parts. Infiniti will reimburse you for such repairs, including diagnosis, up to the amount of Infiniti’s suggested retail price for parts and labor charges based on Infiniti’s recommended time allowance for the warranty repair and the geographically appropriate hourly labor rate. A part not being available or a repair not being complete within 30 days also constitutes an emergency. You must take the replaced part and paid receipts to an authorized Infiniti dealer for repayment in such emergency situations.
MAINTENANCE RECORDS
Receipts covering the performance of regular maintenance are not required but should be kept in the event questions arise concerning maintenance. The receipts should be transferred to subsequent owners.

IF YOU HAVE QUESTIONS
You may obtain further information concerning these warranties by following the procedure outlined in the “INFINITI OWNER SATISFACTION & ASSISTANCE” section of this booklet. You may also contact or report any violations to the Office of Transportation and Air Quality, Vehicle Compliance Programs Group, U.S. Environmental Protection Agency, Ariel Rios Building (6405J), 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20460 or the Chief, Mobile Source Division, Air Resources Board, 9528 Telstar Ave., El Monte, CA. 91731.

OTHER OBLIGATIONS
Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

The Emission Warranty for 2004 vehicles certified for sale in California may be subject to future administrative or judicial action. As a result, this warranty may be changed. Nissan will make those changes required by future law, regulation, or judicial or administrative action. In addition, Nissan reserves the right to change the terms of the warranty to be consistent with these actions.
RECOMMENDATION FOR MAINTENANCE SERVICE AND REPLACEMENT PARTS

To assure best results and to maintain the original quality built into the emission control systems, it is recommended that parts and accessories supplied by Nissan for use on Infiniti vehicles be used when servicing or repairing the systems.

THE WARRANTY OBLIGATIONS ARE NOT DEPENDENT UPON THE USE OF ANY PARTICULAR BRAND OF REPLACEMENT PARTS AND THE OWNER MAY ELECT TO USE NON-GENUINE NISSAN PARTS FOR REPLACEMENT PURPOSES.

The use of replacement parts which are not equivalent to genuine Nissan parts may reduce the effectiveness of the emission control system.

Therefore, if it becomes necessary to use other than genuine Nissan parts, the owner should assure himself that such parts are warranted by their manufacturer to be equivalent in quality to genuine Nissan parts.

MAINTENANCE, REPLACEMENT OR REPAIR OF THE EMISSION CONTROL DEVICES AND SYSTEMS MAY BE PERFORMED BY ANY AUTOMOTIVE REPAIR ESTABLISHMENT OR INDIVIDUAL USING ANY EQUIVALENT REPLACEMENT PART.

HOWEVER, UNLESS OTHERWISE AUTHORIZED BY LAW, WARRANTY SERVICE MUST BE PERFORMED BY AN AUTHORIZED INFINITI DEALER.

The emission standards may be satisfied by having the vehicle inspected periodically and by following the requirements outlined in the Emission Control System Maintenance Schedules in your Owner’s Manual.

• Your tires bear Department of Transportation prescribed tire identification numbers and your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer or Dunlop recommendations, and
• Your vehicle was purchased on or after March 1, 2003.

WHAT IS COVERED AND FOR HOW LONG?

FREE TIRE REPLACEMENT
Any Dunlop tire eligible under the provisions of this limited warranty and removed from service due to a covered warranty condition during the first 2/32” treadwear or 12 months from date of purchase, whichever occurs first, will be replaced with a comparable new Dunlop tire at no charge. Mounting and balancing are included. (Without proof of purchase, date of manufacture will be used to determine age.)

TEMPORARY SPARE TIRES
Any Dunlop temporary spare tire eligible under the provisions of this limited warranty and removed from service due to a covered warranty condition during the first 50 percent of usable treadwear will be replaced with a comparable new Dunlop temporary spare tire at no charge, including mounting.

PRORATED ADJUSTMENT
A tire not eligible for no-charge replacement that is removed from service due to a covered warranty condition will be replaced with a comparable new Dunlop tire on a prorated basis.

HOW WILL PRORATED CHARGES BE CALCULATED?
Replacement price will be calculated by multiplying the tire’s advertised retail selling price at the time of adjustment by the percentage of usable original tread that has been worn off. You pay for mounting, balancing and applicable taxes.

Example: If your disabled tire had an original 8/32” of usable treadwear and is worn to 4/32” usable tread remaining, you have used 50 percent and, therefore, must pay 50 percent of the current advertised selling price of the replacement tire. If the price of the new replacement tire is $80, the cost to you would be $40 plus any additional charges such as mounting, balancing and applicable taxes.

WHAT IS A COMPARABLE TIRE?
A comparable new Dunlop tire may either be the same line of tire or, in the event that the tire is not available, a tire of the same basic construction and quality with a different side-wall or tread configuration. If a higher priced tire is accepted as replacement, the difference in price will be at an additional charge to you.

ADDITIONAL PROVISIONS
A tire has delivered its full original treadlife and the coverage of this warranty ends when the treadwear indicators become visible (worn to 2/32”), or six (6) years from the date of original tire manufacture or new tire purchase date. (Without proof of purchase, date of manufacture will be used to determine age.)

Any replacement tire provided pursuant to this warranty will be covered by the Dunlop warranty in effect at the time of replacement.

LIMITATIONS
This limited warranty is applicable only in the United States and Canada.

(cont’d next page...)
DUNLOP PASSENGER TIRE LIMITED WARRANTY

WHAT IS NOT COVERED BY THIS WARRANTY?
This limited warranty does not cover the following:

- Tires submitted for ride disturbance complaints that are worn beyond the first two thirty-seconds of an inch (2/32") tread depth.
- Dunlop does not warrant or give credit in any adjustment transaction for any kind of material added to a tire (e.g., tire fillers, sealants, balancing substances) after the tire leaves a factory producing Dunlop tires, nor will it adjust any tire that has failed as a result of adding such material.
- Irregular wear or damage due to mechanical condition of the vehicle, improper inflation, overloading, high speed spin-up, misapplication, misuse, negligence, racing, use of tire chains, improper mounting or demounting, improper repair, wreck, collision or fire.
- Road hazards (includes, but not limited to, punctures, cuts, snags, impact breaks, etc.).
- Any tire that after leaving a factory producing Dunlop tires has been intentionally altered to change its appearance (e.g., white inlay on a black tire, regrooving or siping).
- Tires with weather-cracking that were purchased more than four (4) years prior to presentation for adjustment.
- Loss of time, inconvenience, loss of vehicle use, incidental or consequential damages.

WHAT ARE YOUR LEGAL RIGHTS?
Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear Dunlop Tires North America, Ltd. (GDTNA), except as stated herein.

HOW DO YOU OBTAIN AN ADJUSTMENT?
A. You must present the tire to be adjusted to an authorized Dunlop service facility. Tires replaced on an adjustment basis become the property of Goodyear Dunlop Tires North America, Ltd. or Goodyear Canada Inc.
B. You must pay for taxes and any additional services you order at the time of adjustment.
C. You must submit your claim on a GDTNA claim form supplied by an authorized Dunlop service facility. The form must be filled out completely and signed by you, the owner of the tire presented for adjustment, or your authorized agent.

TIRE CARE AND MAINTENANCE GUIDE
The easiest way to help ensure satisfactory mileage and performance from your Dunlop tires is to give them a simple but frequent inspection for proper inflation, even treadwear, and the presence of any damage.

DO MAINTAIN PROPER INFLATION PRESSURE IN YOUR TIRES
Proper inflation pressure is necessary for optimum tire performance, safety and fuel economy. To maintain proper inflation pressure, frequently check tires (when they are cool) with an accurate tire pressure gauge.*

For example, it is difficult to tell just by looking at radial tires whether they are underinflated.
Furthermore, when operating a vehicle equipped with radial tires, it is difficult to notice when a tire has gone flat or nearly flat since the "feel" of the vehicle does not change significantly.

*Evidence of air loss or repeated underinflation always requires expert inspection to determine the source of leakage and tire removal to determine repairability. To avoid injury, NEVER attempt to reinflate a tire that has been run severely underinflated.

Progressive air loss may result from punctures, cuts, curbing, impacts or partial bead unseating. Some fitment causes for air loss are (1) incomplete bead seating, (2) bead tearing caused by a machine tool due to insufficient lubrication or improper adjustment, (3) leaking valve core or rubber valve components. These should be replaced when problems are detected and whenever tires are replaced.

Always maintain inflation pressure at the level recommended by the vehicle manufacturer as shown on the vehicle placard or in the owner’s manual:

Underinflation is the leading cause of tire failure and may result in severe cracking, component separation or "blowout." It reduces tire load capacity, allows excessive sidewall flexing and increases rolling resistance, resulting in heat and mechanical damage. Maintaining proper inflation pressure is the single most important thing you can do to ensure tire durability and maximum treadlife.

Overinflation increases stiffness, which may deteriorate ride and generate unwanted vibration. Overinflation also increases the chances of impact damage.

DON’T OVERLOAD YOUR VEHICLE

Check your vehicle owner’s manual to determine the load limits. Overloading your vehicle places stress on your tires and other critical vehicle components. Overloading a vehicle can cause poor handling, increased fuel consumption and may cause tire failure.

Never fit your vehicle with new tires that have less load capacity than shown on the vehicle tire placard and remember that optimum rim width is important for proper tire load distribution and function.

The maximum load capacity stamped on the sidewalls of P-Metric tires is reduced by 10 percent when used on a light truck, utility vehicle or trailer. Never fit P-Metric tires to light trucks that specify LT-type replacement tires.

DON’T SPIN YOUR TIRES EXCESSIVELY

Avoid excessive tire spinning when your vehicle is stuck in snow, ice, mud or sand. The centrifugal forces generated by a free-spinning tire/wheel assembly may cause sudden tire explosion resulting in vehicle damage and/or serious personal injury to you or a bystander. Never exceed 35 mph/60 km/h as indicated on your speedometer. Use a gentle backward and forward rocking motion to free your vehicle for continued driving. Never stand near or behind a tire spinning at high speed as, for example, while attempting to push a vehicle that is stuck or when an on-the-car spin balance machine is in use.

DO CHECK YOUR TIRES FOR WEAR

Always remove tires from service when they reach two thirty-seconds of an inch (2/32") remaining tread depth. All new tires have treadwear indicators which appear as smooth banks in the tread grooves when they wear to the two thirty-seconds of an inch (2/32") level. Many wet weather accidents result from skidding on bald or nearly bald tires. Excessively worn tires are also more susceptible to penetrations.

SIDEWALL TREATMENTS

Dunlop sidewalls are specially compounded to resist ozone cracking or weather-cracking.

(Cont’d next page...)
DUNLOP PASSENGER TIRE LIMITED WARRANTY

Use a mild soap solution to clean sidewalls, white striping or lettering, and rinse off with plain water. Instruct service personnel and customers never to apply any other material to enhance sidewall appearance. These may degrade rubber and remove inherent ozone resistance.

DO CHECK YOUR TIRES FOR DAMAGE
Frequent inspection of your tires for signs of damage and their general condition is important for safety. If you have any questions, have your tire dealer inspect them. Impacts, penetrations, cracks, knots, bulges, or air loss always require tire removal and expert inspection. Never perform a temporary repair or use an innertube as a substitute for a proper repair. Only qualified persons should repair tires.

PROPER TIRE REPAIR
NOTE: Dunlop does not warrant any inspection or repair process. The repair is entirely the responsibility of the repairer and should be made in accordance with established Rubber Manufacturers Association (RMA) procedures.

DON’T ATTEMPT TO MOUNT YOUR OWN TIRES
Serious injury may result from explosion of tire/rim assembly due to improper mounting procedures. Follow tire manufacturer’s instructions and match tire diameter to rim diameter. Mount light truck radials on rims approved for radial service. Do not apply bead sealer. This can inhibit bead seating. Lubricate beads and tire rim (including tube or flap) contact surfaces. Lock assembly on mounting machine or place in safety cage. STAND BACK and never exceed 40 psi to seat beads. Never use a volatile substance or a rubber “donut” (also known as a bead expander or “O-Ring”) to aid bead seating. Only specially trained persons should mount tires.

DON’T MIX TIRES OF DIFFERENT SIZES AND TYPES ON THE SAME AXLE
For optimum handling and control, Dunlop recommends fitment of four (4) tires of the same type and size unless otherwise specified by the vehicle manufacturer.

FOLLOW THESE ADDITIONAL GUIDELINES:
Fit newest tires on rear axle. If radials and non-radials must be fitted to the same vehicle, fit radials on rear axle. Never mix radials and non-radials on the same axle. When fitting snow tires or all-season tires to performance vehicles, always fit in sets for four. Do not fit tires with different speed ratings.

Use of lift kits with some vehicle/tire combinations can cause instability. When changing tire sizes, always consult dealer for optimum rim width and carefully check vehicle/tire clearances.

RETREADED TIRES
Retreaded passenger and light truck tires are not warranted by Dunlop for any reason. Dunlop speed ratings and U.S. Department of Transportation test compliance certifications are voided for retreaded tires.

DO MAINTAIN VEHICLE SUSPENSION, WHEEL ALIGNMENT AND BALANCE AND ROTATE YOUR TIRES
Lack of rotation, worn suspension parts, underinflation/over-inflation, wheel imbalance, and misalignment can cause vibration or irregular tire wear. Rotate your tires according to your vehicle manufacturer’s recommendations or at maximum intervals of 6,000 miles/10,000 km.

LIGHTWEIGHT TEMPORARY SPARE TIRES

IMPORTANT SAFETY INSTRUCTIONS
• Limit vehicle speed when using the lightweight temporary spare tire to 50 mph/80 km/h or less.
• Check the inflation pressure before using and at least weekly. Maintain cold tire pressure in accordance with that molded on the tire sidewall or found in your vehicle owner’s manual. When inflating or adding air to light-weight temporary spare tire, be very careful, since the smaller tire volume can gain pressure quickly. Leave valve core in place and add inflation air in short bursts.
Check the pressure often with an in-line or hand gauge until the specified pressure is reached.

- The lightweight temporary spare tire may lower ground clearance when used. Reduce speed and avoid driving over large obstacles or through chuckholes and other road hazards.
- Check your car owner’s manual for other special clearance precautions when using the lightweight temporary spare tire provided in your vehicle.
- Because your lightweight temporary spare tire was specifically designed for your car, it should not be used on any other vehicle.
- Do not use snow chains on your lightweight temporary spare tire. This could cause damage to your vehicle.
- Your lightweight temporary spare has very limited wear potential (up to 300 miles/500 km).
- In order to conserve tire treadlife, the lightweight temporary spare tire should be returned to your trunk as soon as the standard tire has been repaired or replaced. Never use the spare if tread-wear indicator (TWI) bars are exposed or it is worn to the last 2/32” tread depth.
- Do not use your original equipment lightweight temporary spare tire on any other than its original equipment rim. The replacement lightweight temporary spare tire must match the original equipment tire removed from your lightweight temporary spare rim. Check the tire for the lightweight temporary spare tire size marking designation and compare size markings with those found on both your original lightweight temporary spare and rim.

**NOTE:** Your original equipment lightweight temporary spare tire and rim combination is not the same size as the other tires and rims with which your vehicle is equipped. Standard tires, snow tires, conventional wheel covers or rim rings should not be fitted to your lightweight temporary spare tire rim or assembly.

- Improper mounting can cause tire/rim assembly explosion and serious injury. Tire Fitters: Follow tire manufacturer’s instructions and match tire diameter to rim diameter. Mount the lightweight temporary spare tire only on a rim originally fitted with a temporary spare of the same size. Lubricate beads and rim contact surfaces. Lock assembly on mounting machine or place in a safety cage. STAND BACK; inflate in short bursts with extension hose, clip-on chuck on in-line gauge. Never exceed 40 psi to seat beads or use a volatile substance or a rubber “donut” to aid bead seating. Only specially trained persons should mount lightweight temporary spare tires.

Dunlop brand tires are serviced by The Goodyear Tire & Rubber Company and Goodyear Canada Inc. through authorized Dunlop outlets.

You must go to an authorized Dunlop outlet for replacement tires and all warranty service.

SAFETY WARNINGS

Serious injury or property damage may result from:

• TIRE FAILURE DUE TO UNDERINFLATION/OVERLOADING:
  Follow the owner’s manual, tire placard in vehicle, or Important Tire Safety Information located in this booklet.

• EXPLOSION OF TIRE/RIM ASSEMBLY DUE TO IMPROPER MOUNTING:
  Only specially trained persons should mount tires.

• FAILURE TO MOUNT RADIAL TIRES ON APPROVED RIMS.

• FAILURE TO DEFLATE SINGLE OR DUAL ASSEMBLIES COMPLETELY BEFORE DEMOUNTING.

• TIRE SPINNING ON SLIPPERY SURFACES SUCH AS SNOW, MUD, ICE, ETC. DO NOT SPIN TIRES IN EXCESS OF 35 MPH (55 KPH), AS INDICATED ON THE SPEEDOMETER. PERSONAL INJURY AND SEVERE DAMAGE MAY RESULT FROM EXCESSIVE WHEEL SPINNING, INCLUDING TIRE DISINTEGRATION OR AXLE FAILURE.
ELIGIBILITY
You are eligible for the benefits of this policy if you are the owner or authorized agent of the owner of new Goodyear highway auto tires bearing Department of Transportation prescribed tire identification numbers, and if your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer’s recommendations.

COVERAGE (REPLACEMENT FREE)
Any new Goodyear highway radial auto tire covered by this policy, that does not deliver satisfactory highway service due to a workmanship or material related condition (see Adjustment Policy Limitations) during the first 25% of usable treadwear, or twelve months from date of purchase, whichever comes first, will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included.

Any Goodyear temporary spare tire that does not deliver satisfactory highway service due to a workmanship or material related condition during the first 50% of usable tread depth (1/32 of an inch) will be replaced with a comparable new Goodyear temporary spare tire without charge. Mounting is included. After the first 50% of usable treadwear, you pay only an adjustment charge for the treadwear received, plus any mounting charge.

COVERAGE (PRORATED ADJUSTMENT)
Tires not eligible for no charge adjustment that do not deliver satisfactory service due to a workmanship or material related condition will be replaced with comparable new Goodyear tires on a pro rata basis. The replacement price will be calculated by multiplying the current Goodyear “predetermined price for adjustment” or current advertised price at adjustment location (whichever is lower) by the percentage of usable original tread that has been worn off at the time of the adjustment. You pay for mounting, balancing, and an amount equal to the full current Federal Excise Tax applicable to the comparable new replacement tire.

The “predetermined price for adjustment,” available at all Goodyear Auto Service Centers and participating dealers, fairly represents the actual regular retail selling price of the comparable tire at the time of adjustment. If a “predetermined price for adjustment” is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

A tire has delivered its full original tread life and this warranty ends when the treadwear indicators become visible, regardless of age or mileage.

DEFINITION OF COMPARABLE TIRE
A “comparable” new Goodyear tire may either be the same line of tire or, in the event the disabled tire is out of production, the same basic construction and quality with different sidewall or tread configuration.

If a higher priced tire is accepted as replacement, the difference in price will be additional.

Any tire replacement under this warranty will be covered by the Goodyear warranty in effect at time of replacement.

ADJUSTMENT POLICY LIMITATIONS
This limited warranty is applicable only in the United States and Canada.

No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear, except as stated herein.

The following are not covered by this policy:

- Goodyear does not warrant and will not give credit in any adjustment transaction for any kind of material added to the tire after leaving a Goodyear factory, nor will it adjust any tire which has failed as a result of adding any such material. (Example: Tire fillers, sealants, or balancing substances.)

WHAT IS COVERED
Each Michelin Passenger Tire supplied as original equipment on your new Infiniti vehicle which bears the Michelin name and complete DOT identification number.

WHAT IS COVERED AND FOR HOW LONG
Michelin Passenger tires, used in normal service on the vehicle on which they were originally fitted and in accordance with the maintenance recommendations and safety warnings contained in the owner’s manual and in the Important Tire Safety Information Section of this booklet, are covered by this warranty against defects in workmanship and material for the life of the original usable tread, or 6 years from the date of purchase, whichever comes first. At that time, all warranties, express or implied, are terminated. The usable tread is the original tread down to the level of the tread wear indicators - 2/32nds of an inch (1.6mm) of tread remaining. Date of purchase is documented by new vehicle registration or tire sales invoice. If no proof of purchase, coverage will be based on date of manufacture.

WHAT IS NOT COVERED
Tires which become unserviceable due to:
- Road hazard injury (e.g., a cut, snag, bruise, impact damage, puncture, whether repairable or not);
- Incorrect mounting of the tire, tire/wheel imbalance, or improper repair;
- Underinflation, overinflation, improper maintenance or other abuse;
- Mechanical irregularity in the vehicle such as wheel misalignment resulting in uneven or rapid wear;
- Accident, fire, chemical corrosion, tire alteration, or vandalism;
- Ozone or weather cracking.

WHAT MICHELIN WILL DO
Passenger Tires
A tire which becomes unserviceable due to a condition covered by this warranty will be replaced with a comparable new Michelin tire, free of charge, when 2/32nds of an inch (1.6mm) or less of the original tread is worn, (or 25% or less, whichever is most beneficial to the user) and within 12 months of the date of purchase. Mounting and balancing of tires is included. The cost of any other service charges or applicable taxes are payable by the user.

When more than 2/32nds of an inch of original tread has been worn (or more than 25%, whichever is most beneficial to the user) or after 12 months from date of purchase, the user must pay the cost of a comparable new Michelin passenger tire on a pro-rata basis. The dealer shall determine the charge by multiplying the percentage of the original usable tread worn by the current actual selling price at the adjustment location or the price on the current Michelin Base Price List, whichever is lower.* This List is based on a predetermined price intended to fairly represent the actual selling price of the tire. The cost of mounting, balancing and any other service charges of applicable taxes are payable by the user.

WHAT THE CONSUMER MUST DO
When making a claim under the terms of this warranty, the consumer must present the tire to an authorized Michelin Dealer. To locate an Authorized Tire Dealer, check the yellow pages under “Tire Dealers - Retail.”

The vehicle on which the tire was used should be available for inspection.

It is essential that you read and understand the safety and maintenance recommendations for your tires.

Note: For your convenience, your nearest authorized Infiniti dealership will also assist you with your tire service requirements.

DANGER
Disregarding any of the safety precautions and instructions contained in the Owner’s Manual or the Important Tire Safety Information in this booklet may result in tire failure or explosion causing serious personal injury or death.
Any tire, no matter how well constructed, may fail due to improper maintenance or service factors. This could create a risk of property damage and serious or fatal injury. Disregarding any of the safety precautions and instructions contained in this manual may result in tire failure or explosion causing serious personal injury or death. For your safety, comply with the following:

TIRE INFLATION
Keep tires inflated to the pressures recommended on the tire data placard. (See your Owner’s Manual for location.) These inflation pressures must be maintained as a minimum. However, do not exceed the maximum pressure rating indicated on the tire sidewall.

CHECK INFLATION PRESSURES ON ALL YOUR TIRES, INCLUDING THE SPARE, WHEN TIRES ARE COLD, AT LEAST ONCE A MONTH BEFORE DRIVING
Failure to maintain correct inflation may result in improper vehicle handling and may cause rapid and irregular tire wear, sudden tire destruction, loss of vehicle control and serious personal injury. Therefore, inflation pressures should be checked at least once a month and always prior to long distance trips.

Pressures should be checked when tires are cold. The tires are cold when your vehicle has been driven less than a mile at moderate speed after being stopped for three or more hours.

CHECKING PRESSURE WHEN TIRES ARE HOT
If you must add air when your tires are hot, add four pounds per square inch (psi) (28kPa) above the recommended cold air pressure. Recheck the inflation pressure when the tire is cold.

For Example Only:
Gauge reading of hot tire: 32psi
If recommended pressure is: 30psi
Desired gauge reading of hot tire 30 + 4psi = 34psi
Check cold pressures as soon as possible, at least by the next day. Never “Bleed” air from hot tires as your tire will be underinflated. Use an accurate tire gauge to check pressures. Never allow children to air up tires.

DRIVING ON ANY TIRE THAT DOES NOT HAVE THE CORRECT INFLATION PRESSURE IS DANGEROUS.
Underinflation produces extreme flexing of the sidewalls and builds up heat which may result in sudden tire destruction and serious personal injury. Overinflation can cause the tire to be more susceptible to impact damage.

LOAD LIMITS
DO NOT OVERLOAD. DRIVING ON ANY OVERLOADED TIRE IS DANGEROUS. Never load your tires beyond the load carrying limits molded into the sidewall of the tires or the maximum vehicle load limit as shown on the vehicle tire data placard, whichever is less. Overloading causes heat to build up which can lead to sudden tire failure and serious personal injury.

SPEED LIMITS AND SPEED RATED TIRES
HIGH SPEED DRIVING CAN BE DANGEROUS. Never operate your vehicle in excess of lawful speeds or the maximum speeds justified by the driving conditions. Excessive speeds or racing can cause heat buildup in a tire leading to possible failure and serious personal injury.

*Provided by and published at the request of the tire manufacturers/warrantors.
IMPORTANT TIRE SAFETY INFORMATION*

Correct inflation pressure is especially important. However, at high speeds, even with the correct inflation pressure, a road hazard, for example, is more difficult to avoid and if contact is made, there is a greater chance of causing tire damage than at the lower speed. Moreover, driving at high speed reduces the reaction time available to avoid accidents and bring your vehicle to a safe stop. If you see any damage to a tire or wheel, replace it with your spare tire and see your tire dealer at once.

Tire speed ratings do not imply that a vehicle can be safely driven at the maximum speed for which the tire is rated. In addition, some damages or improper repairs may cause a speed-rated tire to lose its speed rating. Exceeding the tire’s maximum speed rating will cause the tire to build up excessive heat which can cause tire damage that could result in sudden tire destruction and rapid air loss. Failure to control a vehicle with sudden air loss can lead to an accident. In any case, you should not exceed reasonable speeds as indicated by the legal limits and driving conditions.

SPEED SYMBOLS - are shown on the sidewall of some tires. The following table shows the maximum speed corresponding to the symbol.

*Some V (or VR) rated tires may have a speed capacity of greater than 149 mph (240 km/h). Consult your tire manufacturer for maximum speed ratings if your vehicle capability exceeds this speed.

**Z (or ZR) rated tires are designed for use on cars with maximum speed capabilities in excess of 149 mph (240 km/h). Consult your tire manufacturer for maximum speed capabilities.

Although a tire may be speed rated, we do not endorse the operation of any vehicle in an unsafe or unlawful manner. Speed ratings are based on laboratory tests which relate to performance on the road, but are not applicable if tires are underinflated, overloaded, worn out, damaged, altered, improperly repaired, or retreaded. Furthermore, tire speed ratings do not imply that vehicles can be safely driven at the maximum speed for which the tire is rated, particularly under adverse road and weather conditions or if the vehicle has unusual characteristics. Most highway passenger tires that do not have a speed symbol in the sidewall have a maximum speed rating of 105 mph. Light truck highway tires that do not have a speed symbol on the sidewall of the tire have a maximum speed of 87 mph. Some light truck tires may have higher maximum speeds; consult your tire dealer. The speed and other ratings of retreaded tires are assigned by the retreader and voids the original manufacturer’s ratings.

*Provided by and published at the request of the tire manufacturers/warrantors.
IMPORTANT TIRE SAFETY INFORMATION*

IMPORTANT: In order to maintain the speed capability of the vehicle, replacement tires must have speed ratings equal to or higher than those fitted as original equipment (as indicated on the vehicle placard or owners manual). If tires with lower speed ratings are fitted, the speed capability of the vehicle will be lowered to the maximum speed capability of the replacement tire as indicated on the above table. Remember...High speed driving can be dangerous and may be damaging to your tires.

And...When driving at highway speeds, correct inflation pressure is especially important.

Contact the manufacturer of your tires for their position and assistance on the repair of speed-rated tires. When you are replacing tires that have a speed rating, you must replace with tires of the same or higher speed rating if the speed capability of the vehicle is to be maintained.

VISUAL INSPECTION

INSPECT YOUR TIRES. DO NOT DRIVE ON A DAMAGED TIRE OR WHEEL. Check your tires frequently for scrapes, bulges, separations, cuts, snags, cracks, penetrations or excessive localized wear from hard braking. Also check for abnormal tire wear particularly on the edges of the tire tread which may be caused by misalignment or underinflation. Impacts can damage the inner portion of the tire without being visible on the outside. If damage can be seen on the tires or wheels, or if you suspect that possible impact damage may have occurred, replace with spare at once and have your tire store or dealer inspect your tires immediately. Use of a damaged tire could result in tire destruction. When inspecting your tires, including the spare, check your air pressures. If your pressure check indicates that one of your tires has lost pressure of two pounds or more, look for signs of penetrations, valve leakage, or wheel damage that may account for the air loss.

All tires will wear out faster when subjected to high speeds as well as hard cornering, rapid starts, sudden stops, frequent driving on roads which are in poor condition, and off-road use. Roads with holes and rocks or other objects can damage tires and cause misalignment of your vehicle. When you drive on such roads, drive on them carefully and slowly, and before driving again at normal or highway speeds, examine your tires for any damage, such as cuts, bulges, penetrations, unusual wear patterns, etc.

WEAR BARS: Tires contain "Wear-Bars" in the grooves of the tire tread which show up when only 2/32nds of an inch (1.6mm) of tread is remaining. At this stage, your tires must be replaced. Tires worn beyond this stage are dangerous.

HAZARDS

Objects in the road that threaten a tire should be safely avoided. These objects are potholes, glass, metal, rocks, wood debris and the like. Unavoidable contact should prompt a thorough tire inspection. You may not always recall hitting an object that can damage or injure your tires. While driving, your vehicle experiences any unusual vibration, ride disturbance or noise and/or you suspect that possible damage to the tires or vehicle has occurred, DO NOT JAM OR LOCK YOUR BRAKES! Rather reduce your speed and drive with caution until you can safely pull off the road. Stop and inspect the tires. If the tire is underinflated or damaged, deflate, remove the tire and rim assembly and replace it with your spare. If you cannot detect a cause, have the vehicle towed to the nearest Infiniti dealer to have the vehicle inspected.

REPAIRING, MOUNTING AND DEMOUNTING OF TIRES

Do not attempt to repair, mount or demount a tire yourself. Tire changing can be dangerous and must be done by professionally trained persons using proper tools and procedures as specified by the Rubber Manufacturers Association (RMA). Follow these mounting recommendations. Your tires should be mounted on wheels of correct size and type and which are in good, clean condition. Bent, chipped or rusted wheels may cause tire damage. The inside of the tire must be free from foreign materials. Have your dealer check the wheels before mounting new tires. Mismatched tires and rims can explode during mounting. Also, mismatched tires and rims can result in dangerous tire failure on the road. If a tire is mounted by error on the wrong-sized rim, do not remount it on the proper rim - scrap it. It may be damaged internally (which is not externally visible) by being dangerously stretched and could fail on the highway.
Old valves may leak. When new tubeless tires are mounted, have new valves of the correct type installed. Tubeless tires must be mounted only on wheels designed for tubeless tires, i.e., wheels which have safety humps or ledges.

Never perform a temporary repair, use an inner tube or inject sealant as a permanent substitute for a proper repair. Only qualified persons should repair tires. Be sure that all your valves have suitable valve caps. This will keep valve cores clean and clear and guard against leakage.

**REPAIRS**

Whenever possible, see a tire dealer at once. Some tire manufacturers do not warrant any inspection or repair process. The repair is entirely the responsibility of the repairer. Punctures in the tread of a passenger tire which do not exceed 1/4 of an inch (6mm) in diameter can usually be repaired by following the Rubber Manufacturers Association (RMA) Passenger and Light Truck Repair procedures. Contact the manufacturer of your tires for its position and assistance as to the acceptable location for a proper repair and the repair of speed rated tires. Do not use plug repairs. They may cause further damage to the tire. They are not always air tight and the plug may fail. Do not exceed posted speed limits on any repaired tire. Certain tire manufacturers speed ratings are voided if the tire is repaired.

Although a tire was properly repaired, internal structural damage resulting from the puncture may have occurred. Some time later the damage may cause the tire to be removed from service. If the tire has a puncture in the tread which exceeds 1/4 inch (6mm), the tire must be replaced. If any tire has sustained a puncture, have the tire inspected internally by a tire dealer for possible damage that may have occurred.

Improper mounting and inflation procedures can cause an explosion of the tire/rim assembly. Only specially trained persons should perform these tasks. Contact your tire store or dealer for assistance.

**CAUTION** - Never, under any circumstance, introduce a flammable substance into a tire.

**WHEEL ALIGNMENT AND BALANCING**

Wheel alignment and balancing are important for safety and maximum mileage from your tires. Check how your tires are wearing at least once a month. If your tires are wearing unevenly, such as the inside shoulder of the tire wearing faster than the rest of the tread, or if you detect excessive vibration, your vehicle may be out of alignment or balance. These conditions not only shorten the life of your tires, but adversely affect the handling characteristics of your vehicle which could be dangerous. If you detect irregular wear or vibration, have your alignment and balance checked immediately. Tires which have been run underinflated will show more wear on the shoulders than in the center of the tread.

**HARD BRAKING**

You must inspect your tires after any hard braking circumstances or after tires have slid on the pavement. This can cause a flat spot in a section of the tire tread.

**TIRE SPINNING**

Never spin your tires above a speedometer reading of 35 mph (55 km/h) if your vehicle becomes stuck. The centrifugal force generated by the free spinning tire/wheel assembly may cause a sudden tire explosion; resulting in vehicle damage and/or serious personal injury or death. Never allow anyone to stand near or behind a tire spinning at high speed while attempting to push a vehicle that is stuck. When in mud, sand, snow, ice or other slippery conditions, do not indulge in excessive wheel spin. In such conditions, with automatic transmission vehicles, by accelerating the engine excessively, it is possible to spin one of the drive tires beyond its speed capability. This is also true when balancing a drive tire/wheel assembly using the engine of the vehicle to spin the wheel.

**TIRE TREAD**

Tires must be replaced when the depth of the tread reaches 2/32 inch (1.6 mm). Tires are manufactured with tread wear indicators molded into the tire grooves which indicate tread wearout. As tires wear...

---

*Provided by and published at the request of the tire manufacturers/warrantors.*
approach 2/32 inch (1.6 mm) wearout, the tread
gauge becomes thinner and more vulnerable to the
effects of road hazards. Also, worn tires are more
subject to hydroplaning, which can cause loss of con-
trol. Therefore, visual tire inspection becomes more
crucial as the tires wear out.

**WORN TIRES**

Never drive on worn tires. Tires should be replaced by
trained personnel when 2/32nds of an inch tread
depth remains, as indicated by the tread wear indica-
tors molded into the tread grooves. In most states, it
is illegal to drive with less than 2/32nds of an inch of
tread remaining.

**TIRE MIXING**

For best performance select tires similar in size and
load rating to the original equipment tires. It is rec-
ommended that the same size and type of tire be used
on all four wheel positions. In certain tires, casing ply
material and ply construction may vary as indicated
on the sidewall of the tire. When changing or replac-
ing tires, it is preferred that all four tires are the same
construction type (i.e., High Performance, All Season,
Mud & Snow) and construction (Radial or Bias Ply).
Tires which meet the Rubber Manufacturer’s
Association (RMA) definition of mud and snow tires
are marked M/S, M+S, M&S.

On such tires, this designation is molded into the
sidewall. Tires without this notation are not recom-
mended for mud and/or snow driving.

Before mixing tires of different types on a vehicle in
any configuration, be sure to check the vehicles
owner’s manual for its recommendations.

If snow tires are needed, it is necessary to select tires
equivalent in size and load rating to the original
equipment tires. Always fit performance snow tires
in sets of four (4) for optimum mud and snow traction
and maintenance of vehicle handling characteristics.
If you do not, it may adversely affect the safety and
handling of your vehicle. It is also important to check
the vehicle owner’s manual before mixing or match-
ing tires on 4-wheel drive vehicles as this may require
special precautions.

Please refer to your Owner’s Manual for more infor-
mation on tire replacement precautions.

**TIRE ROTATION**

Tires on your Infiniti vehicle should be rotated every
7,500 miles or as irregular wear develops. If irregular
wear becomes apparent or if the wear rate on the
tires is perceptibly uneven, the tires should be rotat-
ed in such a way to alleviate the problem. Check your
vehicle for any mechanical problems and correct if
necessary. Any rotation pattern or procedure may be
followed including those indicated in the Owner’s Manual. Some tires have arrows on the sidewall
showing the direction in which the tire should turn.

When rotating this type of tire, care must be taken to
maintain the proper turning direction as indicated by
the arrows. Some vehicles have different tire sizes
specified for front and rear axles. Tires on these vehi-
cles should be rotated side to side. Where a tempo-
rary type spare tire is available, it should not be
included in the tire rotation schedule. Such tires are
intended for temporary use only. Whenever only two
tires are replaced, the new tires should be put on the
rear axle of vehicles equipped with the same size tire
on all four wheel positions.

**TRAILER TOWING**

If you anticipate towing a trailer, you should see a tire
dealer for advice concerning the correct size of tire
and pressure. Tire size and pressure will depend on
the type and size of the trailer and hitch utilized, but
in no case must the maximum cold inflation pressure
or the tire load rating be exceeded. Check the tire
decal and your Owner’s Manual for further recom-
mendations on trailer towing.

**TIRE ALTERATIONS**

Do not perform any alterations on your tires. Alterations may prevent proper performance, leading
to tire damage, which can result in an accident. Tires
which become unserviceable due to alterations such
as truing, whitewall inlays, addition of balancing or
sealant liquids, may be excluded from warranty cov-

IMPORTANT TIRE SAFETY INFORMATION*

HIGH PRESSURE TEMPORARY SPARE TIRES
1) The high-pressure spare tire in your Infiniti vehicle is designed for temporary use only and must not be used continually as a regular tire. The standard tire should be repaired and/or replaced as soon as possible.
2) Avoid driving over obstacles that may damage the tire through impact or cutting, such as potholes, glass, metal, etc.
3) Speed must not exceed 50MPH (80km/h) for non-speed-rated temporary spare tires.
4) Temporary spare tires have a limited treadlife which can vary depending on road conditions and your driving habits. The spare tire should be returned to the trunk as soon as the standard tire can be repaired or replaced.
5) Because the high-pressure spare tire was specifically designed for your car, it should not be used on any other vehicle.
6) Do not use snow chains on your high-pressure spare. This could cause damage to your vehicle.
7) Check the tire’s cold inflation pressure monthly and maintain at 60psi (4.2kg/cm²) even when not in use.
8) The high-pressure spare tire should not be used with any other rim nor should standard tires, wheel covers, or trim rings be used on the high-pressure spare tire rim which was originally installed.
9) When the tread wear indicator appears on the tire, replace it only with the same type spare tire.
10) Do not enter an automatic carwash with a temporary spare tire fitted.
11) Do not make a sharp turn or apply the brakes suddenly when driving on a high-pressure temporary spare.

Note: When using any temporary type spare tire, be sure to follow the vehicle Owner’s Manual instructions.

TIRE STORAGE
All tires should be stored in a cool dry place indoors so that there is no danger of water collecting inside them.

When tires are stored they should be stored in a cool place away from sources of heat and ozone such as hot pipes and electric generators. Be sure that surfaces on which tires are stored are clean and free from grease, gasoline or other substances which could deteriorate the rubber. (Tires exposed to these materials during storage or driving could be subject to sudden failure.)

TO AVOID DAMAGE TO YOUR TIRES AND POSSIBLE ACCIDENT:
• Check tire pressure at least once a month when tires are cold and before long trips.
• Do not underinflate/overinflate.
• Do not overload.
• Drive at moderate speeds, observe legal limits.
• Avoid driving over potholes, obstacles, curbs or edges of pavement.
• Avoid excessive wheel spinning.
• If you see any damage to a tire, replace with spare and see the tire manufacturer’s dealer or your Infiniti dealership.

INFORMATION SPECIFIC TO YOUR BRIDGESTONE RUN-FLAT TIRES

SAFETY WARNING
When in “run-flat” mode, serious injury or death may result from:

- Tire failure due to excessive operation while running flat.
- Aggressive driving, or driving at speeds greater than 55 mph and/or distances greater than 50 miles.
- Tire failure preceded by vibration. If the vehicle begins to vibrate, gradually reduce speed and stop at a safe location. Tire must be replaced before proceeding.
- Handling tire immediately following run-flat operation. Due to the significant amount of heat generated, allow tire to cool before handling.
- Tire or system failure due to service performed by anyone other than specially trained personnel. For assistance, contact Bridgestone/Firestone at 1-800-847-3272 or your Infiniti dealer. Call 1-800-662-6200 for the location of your nearest Infiniti retailer.

CARE OF YOUR RUN-FLAT TIRES
Because of the unique, state-of-the-art technology in your run-flat tires, the low pressure warning system, and the Infiniti wheel on which they are mounted, it is important that you return to your Infiniti dealer or Bridgestone/Firestone Certified Run-Flat retailer service center for each of the following:

- Any tire problem.
- Tire rotation.
- Tire replacement. We recommend that you not mix run-flat tires with conventional non-run-flat tires as the handling characteristics of run-flat tires and conventional tires are different. Clearly you will not have the run-flat capability with the conventional tires.
- Any problems with the low tire pressure warning system.

SAFETY WARNING
Your run-flat tires are designed for limited operation in a run-flat mode. The tires are not designed for continual or repeated driving with air pressure below that recommended by Infiniti. In that situation, your tires will get overheated. This can cause premature failure of your run-flat tires that could lead to serious personal injury or death.

TIRE REPAIRS
Your Bridgestone run-flat tires should not be repaired. If they are damaged, they should be replaced by your Bridgestone/Firestone Run-Flat Certified Retailer under the terms of the Bridgestone/Firestone Run Flat Tire Warranty or by your Infiniti dealer.

INFINITI OWNER SATISFACTION AND ASSISTANCE

Both Infiniti and your Infiniti retailer are dedicated to serving all your automotive needs. Your complete satisfaction is our primary concern. Your Infiniti retailer is available to assist you with all your automobile sales, parts and service requirements.

If, however, a situation arises that you believe has not been addressed to your satisfaction, we ask that you take the following steps.

**STEP 1:**
Discuss the situation with the dealership management. If a problem still exists, contact the dealership’s owner. Your Infiniti retailer is best equipped to resolve the matter for you.

**STEP 2:**
If the concern has still not been addressed to your satisfaction, please contact our Infiniti Consumer Affairs Department using our toll free number:

1-800-662-6200

The Consumer Affairs Department will ask for the following information:

- Your name, address, and telephone number
- Vehicle identification number (on dashboard and permanent Infiniti Total Ownership program card)
- Date of purchase
- Current odometer reading
- Your Infiniti dealership’s name
- Details of the concern

Or you can write to Infiniti with the above information at:

INFINITI DIVISION
Nissan North America, Inc.
Consumer Affairs Department
P.O. Box 47038
Gardena, CA 90247-6838

**STEP 3:**
In the event that you believe Infiniti has been unable to satisfactorily address the problem, a special automotive complaint resolution program called AUTO LINE is available to you. The AUTO LINE program is independently operated by the Council of Better Business Bureaus, Inc. (BBB).

For information about the BBB AUTO LINE in your area, please call us (Infiniti) at the same toll free number (1-800-662-6200). We will be happy to provide you with the address and phone number of your local BBB office or any other information about AUTO LINE.

Or you may contact the BBB at:

AUTO LINE
Council of Better Business Bureaus, Inc.
4200 Wilson Blvd.
Arlington, Virginia 22203
1 (800) 955-5100

If you call, the BBB staff will record the details of your complaint by telephone. They will ask for the same information as in Step 2.

The AUTO LINE program consists of two parts: mediation and arbitration. The AUTO LINE Staff will attempt to provide suggestions for resolving the problem during mediation. If a satisfactory resolution has not been achieved during mediation, you will have the opportunity to present your case personally before an impartial person or three person panel. This is the arbitration part of AUTO LINE. The arbitrator(s) will make a decision after the arbitration hearing.
The BBB must send you a final decision in your case within forty (40) days (plus 7 days, if you have not contacted Infiniti) unless you delay the process. If you accept the decision, it will be legally binding on you and Infiniti. If you do not accept the decision, it will not be legally binding on you or Infiniti. However, in some states, if the decision is not accepted, it may be introduced either by you or by Infiniti as evidence in a subsequent court action.

Use of BBB AUTO LINE is generally completely voluntary. However, some states may specify that complaint resolution systems such as AUTO LINE that are sponsored by the manufacturer or distributor, and that comply with certain Federal regulations, must be used before you may use their state-operated complaint resolution systems or before you may file a lawsuit, or have certain other rights provided you by state law. In those states, Infiniti requires you first to apply to and utilize Auto Line in good faith prior to using these other remedies which may be available to you.

AUTO LINE may not be available in all states. We, Infiniti, can provide you with information about the availability of AUTO LINE in your state, or call the AUTO LINE number listed above.

ELIGIBILITY: Infiniti vehicles less than four years old from date delivered to the first retail buyer or otherwise put into use, and with fewer than 60,000 miles, are eligible for the program.

ASSISTANCE OUTSIDE OF WARRANTY
In support of our commitment to the “Total Ownership Experience,” Infiniti may occasionally offer to pay or reimburse for part or all of the cost of making certain, specific repairs beyond or outside of the terms of the warranty for some specific vehicle models. (Some states refer to such programs as “adjustment programs”). In such circumstances Infiniti mails notices to all known registered owners of affected vehicles. You may additionally inquire of your authorized Infiniti dealer or of Infiniti directly at the number listed below of the applicability of such programs to your vehicle. Infiniti may occasionally offer special assistance that may pay for part or all of vehicle repairs beyond the expiration of the limited warranty period on a case by case basis. Should you experience unusual difficulties with your vehicle please discuss the situation with your retailer. If your retailer is unable to assist you, you may call the Infiniti Consumer Affairs Department at 1-800-662-6200 to discuss your concern. You will need to provide the Model, Model Year, VIN (Vehicle Identification Number), mileage, maintenance history, a detailed explanation of the concern, and why you believe that Infiniti should be responsible for the repair. Your request will be individually investigated and you will be informed of Infiniti’s decision.

Please also review the “Supplement to the 2003 Infiniti Warranty Information Booklet & 2003 Owner’s Manual” for important information concerning consumer rights in your state.
2003 NEW VEHICLE LIMITED WARRANTY

WHO IS THE WARRANTOR
NISSAN1 warrants all parts of your 2003 Infiniti vehicle supplied by Nissan, except for those listed under the caption “WHAT IS NOT COVERED.”

APPLICABILITY
• This warranty is provided to the original and subsequent owner(s) of an Infiniti vehicle originally distributed by Nissan, which is originally sold by a Nissan authorized Infiniti dealership in the United States (excludes Hawaii), and which is registered and normally operated in the United States (including Alaska and Hawaii), the United States territories (specifically Guam, Saipan, American Samoa, Puerto Rico, and the U.S. Virgin Islands), and Canada.

• Your Infiniti vehicle is manufactured to meet U.S. regulations and environmental requirements. The following statement is required to be provided by regulations of the California Air Resources Board.

YOUR WARRANTY RIGHTS AND OBLIGATIONS
The California Air Resources Board is pleased to explain the emission control system warranty on your 2003 vehicle. In California, new motor vehicles must be designed, built and equipped to meet the State’s stringent anti-smog standards. Nissan must warrant the emission control system on your vehicle for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your vehicle.

Your emission control system may include parts such as the fuel-injection system, the ignition system, catalytic converter and engine computer. Also included may be hoses, belts, connectors and other emission-related assemblies.

Where a warrantable condition exists, Nissan will repair your vehicle at no cost to you including diagnosis, parts and labor.

MANUFACTURER’S WARRANTY COVERAGE
For 4 years or 60,000 miles (whichever occurs first):
1) If your vehicle fails a Smog Check inspection, all necessary repairs and adjustments will be made by Nissan to ensure that your vehicle passes the inspection. This is your emission control system PERFORMANCE WARRANTY.
2) If any emission-related part on your vehicle is defective, the part will be repaired or replaced by Nissan. This is your short-term emission control system DEFECTS WARRANTY.

For 7 years or 70,000 miles (whichever occurs first): If an emission-related part listed in this warranty booklet specially noted with coverage for 7 years or 70,000 miles is defective, the part will be repaired or replaced by Nissan. This is your long-term emission control system DEFECTS WARRANTY.

OWNER’S WARRANTY RESPONSIBILITIES
As the vehicle owner, you are responsible for the performance of the required maintenance listed in your Owner’s Manual. Nissan recommends that you retain all receipts covering maintenance on your vehicle, but Nissan cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

You are responsible for presenting your vehicle to an Infiniti retailer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.

As the vehicle owner, you should also be aware that Nissan may deny you warranty coverage if your vehicle or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.

If you have any questions regarding your warranty rights and responsibilities, you should contact Infiniti’s Consumer Affairs Department at 1-800-662-6200 or the California Air Resources Board at 9528 Telstar Avenue, El Monte CA 91731.

Important information concerning maintenance service and replacement parts is on page 14 of this booklet. No warranty claim will be denied solely because a non-Nissan part was used for maintenance or repair.

CALIFORNIA VEHICLE INSPECTION PROGRAM
Under this program, if your vehicle fails a "smog check" test, you may choose to have diagnosis of the failure and repairs made at an Infiniti dealer or at another service facility. If the inspection failure is the result of a condition covered by these warranties, you must take your vehicle to an Infiniti retailer for warranty repairs. This includes parts, labor and diagnosis. OTHER OBLIGATIONS
Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

The Emission Warranty for 2003 vehicles certified for sale in California may be subject to future administrative or judicial action. As a result, this warranty may be changed. Nissan will make those changes required by future law, regulation, or judicial or administrative action. In addition, Nissan reserves the right to change the terms of the warranty to be consistent with these actions.
RECOMMENDATION FOR MAINTENANCE SERVICE AND REPLACEMENT PARTS

To assure best results and to maintain the original quality built into the emission control systems, it is recommended that parts and accessories supplied by Nissan for use on Infiniti vehicles be used when servicing or repairing the systems.

THE WARRANTY OBLIGATIONS ARE NOT DEPENDENT UPON THE USE OF ANY PARTICULAR BRAND OF REPLACEMENT PARTS AND THE OWNER MAY ELECT TO USE NON-GENUINE NISSAN PARTS FOR REPLACEMENT PURPOSES.

The use of replacement parts which are not equivalent to genuine Nissan parts may reduce the effectiveness of the emission control system.

Therefore, if it becomes necessary to use other than genuine Nissan parts, the owner should assure himself that such parts are warranted by their manufacturer to be equivalent in quality to genuine Nissan parts.

MAINTENANCE, REPLACEMENT OR REPAIR OF THE EMISSION CONTROL DEVICES AND SYSTEMS MAY BE PERFORMED BY ANY AUTOMOTIVE REPAIR ESTABLISHMENT OR INDIVIDUAL USING ANY EQUIVALENT REPLACEMENT PART.

HOWEVER, UNLESS OTHERWISE AUTHORIZED BY LAW, WARRANTY SERVICE MUST BE PERFORMED BY AN AUTHORIZED INFINITI RETAILER.

The emission standards may be satisfied by having the vehicle inspected periodically and by following the requirements outlined in the Emission Control System Maintenance Schedules in your Owner’s Manual.

SUMMARY OF THE NISSAN LIFETIME REPLACEMENT PANEL CORROSION LIMITED WARRANTY

NISSAN warrants to the Original Repairing Vehicle Owner and subsequent owners of the vehicle that Infiniti will either repair or replace the Genuine Infiniti Outer Sheet Metal Replacement Panels you install or have installed on your Infiniti vehicle should the purchased panels develop inside out rust-through corrosion perforation. Replacement sheet metal panels must be installed on vehicles owned and operated in the United States and Canada.

Nissan warrants that the replacement and refinishing of panels will be carried out at no cost subject to the limitations and exclusions listed below.

Nissan will pay for the cost of the repair, including parts, labor, paint, and supplies necessary to repair or replace the panels.

EXCLUSIONS
This warranty becomes void when damage results from:
1. Accident, collision, faulty installation, or any alteration to the panel, panels, or vehicle that could be reasonably expected to affect the performance of the covered panel.
2. Environmental conditions, such as hail, lightning, or acid rain.
3. Vehicle neglect, abuse, or use of the vehicle for unintended purposes.
4. Stone chips, scratches, or other paint damage that lead to surface rust damage.
5. Cleaning and polishing chemicals, and solvents, including improper undercoating, or other rust prevention materials.

TO OBTAIN WARRANTY SERVICE
The repair may be completed at an authorized Infiniti retailer collision repair shop or an independent collision repair shop that will install Genuine Infiniti replacement parts. Whether an Infiniti retailer collision repair shop or independent collision repair shop completes the repair, only authorized Infiniti personnel can approve a repair or replacement under the warranty.

The purchaser must present the warranty form, original receipts and/or work orders to an Infiniti retailer in order to invoke this warranty. The retailer will then authorize the replacement of the panels at an Infiniti retailer’s collision repair shop, or an independent collision repair shop.

LIMITATION OF WARRANTIES AND OTHER WARRANTY TERMS AND STATE LAW RIGHTS

ELIGIBILITY
You are eligible for the benefits of this policy if you are the owner or authorized agent of the owner of new Goodyear highway auto tires bearing Department of Transportation prescribed tire identification numbers, and if your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer’s recommendations.

COVERAGE (REPLACEMENT FREE)
Any new Goodyear highway radial auto tire covered by this policy, that does not deliver satisfactory highway service due to a workmanship or material related condition (see Adjustment Policy Limitations) during the first 25% of usable treadwear, or twelve months from date of purchase, whichever comes first, will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included.

Any Goodyear temporary spare tire that does not deliver satisfactory highway service due to a workmanship or material related condition during the first 50% of usable tread depth (1/32 of an inch) will be replaced with a comparable new Goodyear temporary spare tire without charge. Mounting is included. After the first 50% of usable treadwear, you pay only an adjustment charge for the treadwear received, plus any mounting charge.

COVERAGE (PRORATED ADJUSTMENT)
Tires not eligible for no charge adjustment that do not deliver satisfactory service due to a workmanship or material related condition will be replaced with comparable new Goodyear tires on a pro rata basis. The replacement price will be calculated by multiplying the current Goodyear “predetermined price for adjustment” or current advertised price at adjustment location (whichever is lower) by the percentage of usable original tread that has been worn off at the time of the adjustment. You pay for mounting, balancing, and an amount equal to the full current Federal Excise Tax applicable to the comparable new replacement tire.

The “predetermined price for adjustment,” available at all Goodyear Auto Service Centers and participating dealers, fairly represents the actual regular retail selling price of the comparable tire at the time of adjustment. If a “predetermined price for adjustment” is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

A tire has delivered its full original tread life and this warranty ends when the treadwear indicators become visible, regardless of age or mileage.

DEFINITION OF COMPARABLE TIRE
A “comparable” new Goodyear tire may either be the same line of tire or, in the event the disabled tire is out of production, the same basic construction and quality with different sidewall or tread configuration.

Any tire replacement under this warranty will be covered by the Goodyear warranty in effect at time of replacement.

ADJUSTMENT POLICY LIMITATIONS
This limited warranty is applicable only in the United States and Canada.
No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear, except as stated herein.

The following are not covered by this policy:
• Goodyear does not warrant and will not give credit in any adjustment transaction for any kind of material added to the tire after leaving a Goodyear factory, nor will it adjust any tire which has failed as a result of adding any such material. (Example: Tire fillers, sealants, or balancing substances.)

  - Loss of time, inconvenience, loss of use of the vehicle or consequential damage.

Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitations or exclusion may not apply to you.

SAFETY WARNING

Follow safety precautions and instructions contained in the Owner's Manual, tire placard in the vehicle or the Important Tire Safety Information in this booklet. Disregarding tire safety information may result in tire failure or explosion causing serious personal injury or death.
WHAT IS COVERED
Each Michelin Passenger Tire supplied as original equipment on your new Infiniti vehicle which bears the Michelin name and complete DOT identification number.

WHAT IS COVERED AND FOR HOW LONG
Michelin Passenger tires, used in normal service on the vehicle on which they were originally fitted and in accordance with the maintenance recommendations and safety warnings contained in the owner’s manual and in the Important Tire Safety Information Section of this booklet, are covered by this warranty against defects in workmanship and material for the life of the original usable tread, or 6 years from the date of purchase, whichever comes first. At that time, all warranties, express or implied, are terminated. The usable tread is the original tread down to the level of the tread wear indicators - 2/32nds of an inch (1.6mm) of tread remaining. Date of purchase is documented by new vehicle registration or tire sales invoice. If no proof of purchase, coverage will be based on date of manufacture.

WHAT IS NOT COVERED
Tires which become unserviceable due to:

- Road hazard injury (e.g., a cut, snag, bruise, impact damage, puncture, whether repairable or not);
- Incorrect mounting of the tire, tire/wheel imbalance, or improper repair;
- Underinflation, overinflation, improper maintenance or other abuse;
- Mechanical irregularity in the vehicle such as wheel misalignment resulting in uneven or rapid wear;
- Accident, fire, chemical corrosion, tire alteration, or vandalism;
- Ozone or weather cracking.

WHAT MICHELIN WILL DO

Passenger Tires
A tire which becomes unserviceable due to a condition covered by this warranty will be replaced with a comparable new Michelin tire, free of charge, when 2/32nds of an inch (1.6mm) or less of the original tread is worn, (or 25% or less, whichever is most beneficial to the user) and within 12 months of the date of purchase. Mounting and balancing of tires is included. The cost of any other service charges or applicable taxes are payable by the user.

When more than 2/32nds of an inch of original tread has been worn (or more than 25%, whichever is most beneficial to the user) or after 12 months from date of purchase, the user must pay the cost of a comparable new Michelin passenger tire on a pro-rata basis. The dealer shall determine the charge by multiplying the percentage of the original usable tread worn by the current actual selling price at the adjustment location or the price on the current Michelin Base Price List, whichever is lower.* This List is based on a predetermined price intended to fairly represent the actual selling price of the tire. The cost of mounting, balancing and any other service charges of applicable taxes are payable by the user.

WHAT THE CONSUMER MUST DO
When making a claim under the terms of this warranty, the consumer must present the tire to an authorized Michelin Dealer. To locate an Authorized Tire Dealer, check the yellow pages under “Tire Dealers - Retail.” The vehicle on which the tire was used should be available for inspection.

It is essential that you read and understand the safety and maintenance recommendations for your tires.

Note: For your convenience, your nearest authorized Infiniti Dealership will also assist you with your tire service requirements.

DANGER
Disregarding any of the safety precautions and in-
structions contained in the Owner’s Manual or the
Important Tire Safety Information in this booklet
may result in tire failure or explosion causing seri-
ous personal injury or death.
Any tire, no matter how well constructed, may fail due to improper maintenance or service factors. This could create a risk of property damage and serious or fatal injury. Disregarding any of the safety precautions and instructions contained in this manual may result in tire failure or explosion causing serious personal injury or death. For your safety, comply with the following:

**TIRE INFLATION**

Keep tires inflated to the pressures recommended on the tire data placard. (See your OWNER’S MANUAL for location.) These inflation pressures must be maintained as a minimum. However, do not exceed the maximum pressure rating indicated on the tire sidewall.

**CHECK INFLATION PRESSURES ON ALL YOUR TIRES, INCLUDING THE SPARE, WHEN TIRES ARE COLD, AT LEAST ONCE A MONTH BEFORE DRIVING**

Failure to maintain correct inflation may result in improper vehicle handling and may cause rapid and irregular tire wear, sudden tire destruction, loss of vehicle control and serious personal injury. Therefore, inflation pressures should be checked at least once a month and always prior to long distance trips.

Pressures should be checked when tires are cold. The tires are cold when your vehicle has been driven less than a mile at moderate speed after being stopped for three or more hours.

**CHECKING PRESSURE WHEN TIRES ARE HOT**

If you must add air when your tires are hot, add four pounds per square inch (psi) (28kPa) above the recommended cold air pressure. Recheck the inflation pressure when the tire is cold.

For Example Only:

Gauge reading of hot tire: 32psi
If recommended pressure is: 30psi
Desired gauge reading of hot tire: $30 + 4psi = 34psi$

Check cold pressures as soon as possible, at least by the next day. Never “Bleed” air from hot tires as your tire will be underinflated. Use an accurate tire gauge to check pressures. Never allow children to air up tires.

**DRIVING ON ANY TIRE THAT DOES NOT HAVE THE CORRECT INFLATION PRESSURE IS DANGEROUS.**

For replacement tires, the correct inflation pressure will be provided by your tire dealer, if not, refer to the vehicle decal.

Underinflation produces extreme flexing of the sidewalls and builds up heat which may result in sudden tire destruction and serious personal injury. Overinflation can cause the tire to be more susceptible to impact damage.

**LOAD LIMITS**

DO NOT OVERLOAD. DRIVING ON ANY OVERLOADED TIRE IS DANGEROUS. Never load your tires beyond the load carrying limits molded into the sidewall of the tires or the maximum vehicle load limit as shown on the vehicle tire data placard, whichever is less. Overloading causes heat to build up which can lead to sudden tire failure and serious personal injury.

**SPEED LIMITS AND SPEED RATED TIRES**

HIGH SPEED DRIVING CAN BE DANGEROUS. Never operate your vehicle in excess of lawful speeds or the maximum speeds justified by the driving conditions. Excessive speeds or racing can cause heat buildup in a tire leading to possible failure and serious personal injury.
IMPORTANT TIRE SAFETY INFORMATION*

Correct inflation pressure is especially important. However, at high speeds, even with the correct inflation pressure, a road hazard, for example, is more difficult to avoid and if contact is made, there is a greater chance of causing tire damage than at the lower speed. Moreover, driving at high speed reduces the reaction time available to avoid accidents and bring your vehicle to a safe stop. If you see any damage to a tire or wheel, replace it with your spare tire and see your tire dealer at once.

Tire speed ratings do not imply that a vehicle can be safely driven at the maximum speed for which the tire is rated. In addition, some damages or improper repairs may cause a speed-rated tire to lose its speed rating. Exceeding the tire’s maximum speed rating will cause the tire to build up excessive heat which can cause tire damage that could result in sudden tire destruction and rapid air loss. Failure to control a vehicle with sudden air loss can lead to an accident. In any case, you should not exceed reasonable speeds as indicated by the legal limits and driving conditions.

SPEED SYM BOLS - are shown on the sidewall of some tires. The following table shows the maximum speed corresponding to the symbol.

** Some V (or VR) rated tires may have a speed capacity of greater than 149 mph (240 km/h). Consult your tire manufacturer for maximum speed ratings if your vehicle capability exceeds this speed.

** Z (or ZR) rated tires are designed for use on cars with maximum speed capabilities in excess of 149 mph (240 km/h). Consult your tire manufacturer for maximum speed capabilities.

Although a tire may be speed rated, we do not endorse the operation of any vehicle in an unsafe or unlawful manner. Speed ratings are based on laboratory tests which relate to performance on the road, but are not applicable if tires are underinflated, overloaded, worn out, damaged, altered, improperly repaired, or retreaded. Furthermore, tire speed ratings do not imply that vehicles can be safely driven at the maximum speed for which the tire is rated, particularly under adverse road and weather conditions or if the vehicle has unusual characteristics.

Most highway passenger tires that do not have a speed symbol in the sidewall have a maximum speed rating of 105 mph. Light truck highway tires that do not have a speed symbol on the sidewall of the tire have a maximum speed of 87 mph. Some light truck tires may have higher maximum speeds; consult your tire dealer. The speed and other ratings of retreaded tires are assigned by the retreader and voids the original manufacturer’s ratings.

*Provided by and published at the request of the tire manufacturers/warrantors.
IMPORTANT: In order to maintain the speed capability of the vehicle, replacement tires must have speed ratings equal to or higher than those fitted as original equipment (as indicated on the vehicle placard or owner's manual). If tires with lower speed ratings are fitted, the speed capability of the vehicle will be lowered to the maximum speed capability of the replacement tire as indicated on the above table.

Remember...High speed driving can be dangerous and may be damaging to your tires. And...When driving at highway speeds, correct inflation pressure is especially important.

Contact the manufacturer of your tires for their position and assistance on the repair of speed-rated tires. When you are replacing tires that have a speed rating, you must replace with tires of the same or higher speed rating if the speed capability of the vehicle is to be maintained.

VISUAL INSPECTION
INSPECT YOUR TIRES. DO NOT DRIVE ON A DAMAGED TIRE OR WHEEL. Check your tires frequently for scrapes, bulges, separations, cuts, snags, cracks, penetrations or excessive localized wear from hard braking. Also check for abnormal tire wear particularly on the edges of the tire tread which may be caused by misalignment or underinflation. Impacts can damage the inner portion of the tire without being visible on the outside. If damage can be seen on the tires or wheels, or if you suspect that possible impact damage may have occurred, replace with spare at once and have your tire store or dealer inspect your tires immediately. Use of a damaged tire could result in tire destruction. When inspecting your tires, including the spare, check your air pressures. If your pressure check indicates that one of your tires has lost pressure of two pounds or more, look for signs of penetrations, valve leakage, or wheel damage that may account for the air loss.

All tires will wear out faster when subjected to high speeds as well as hard cornering, rapid starts, sudden stops, frequent driving on roads which are in poor condition, and off-road use. Roads with holes and rocks or other objects can damage tires and cause misalignment of your vehicle. When you drive on such roads, drive on them carefully and slowly, and before driving again at normal or highway speeds, examine your tires for any damage, such as cuts, bulges, penetrations, unusual wear patterns, etc.

WEAR BARS: Tires contain “Wear-Bars” in the grooves of the tire tread which show up when only 2/32nds of an inch (1.6mm) of tread is remaining. At this stage, your tires must be replaced. Tires worn beyond this stage are dangerous.

HAZARDS

Objects in the road that threaten a tire should be safely avoided. These objects are potholes, glass, metal, rocks, wood debris and the like. Unavoidable contact should prompt a thorough tire inspection. You may not always recall hitting an object that can damage or injure your tires. If while driving, your vehicle experiences any unusual vibration, ride disturbance or noise and/or you suspect that possible damage to the tires or vehicle has occurred, DO NOT JAM OR LOCK YOUR BRAKES! Rather reduce your speed and drive with caution until you can safely pull off the road. Stop and inspect the tires. If the tire is underinflated or damaged, deflate, remove the tire and rim assembly and replace it with your spare. If you cannot detect a cause, have the vehicle towed to the nearest Infiniti dealer to have the vehicle inspected.

REPAIRING, MOUNTING AND DEMOUNTING OF TIRES
Do not attempt to repair, mount or demount a tire yourself. Tire changing can be dangerous and must be done by professionally trained persons using proper tools and procedures as specified by the Rubber Manufacturers Association (RMA). Follow these mounting recommendations. Your tires should be mounted on wheels of correct size and type and which are in good, clean condition. Bent, chipped or rusted wheels may cause tire damage. The inside of the tire must be free from foreign materials. Have your dealer check the wheels before mounting new tires. Mismatched tires and rims can explode during mounting. Also, mismatched tires and rims can result in dangerous tire failure on the road. If a tire is mounted by error on the wrong-sized rim, do not remount it on the proper rim - scrap it. It may be damaged internally (which is not externally visible) by being dangerously stretched and could fail on the highway.

*Provided by and published at the request of the tire manufacturers/warrantors.
IMPORTANT TIRE SAFETY INFORMATION*

Old valves may leak. When new tubeless tires are mounted, have new valves of the correct type installed. Tubeless tires must be mounted only on wheels designed for tubeless tires, i.e., wheels which have safety humps or ledges.

Never perform a temporary repair, use an inner tube or inject sealant as a permanent substitute for a proper repair. Only qualified persons should repair tires.

Be sure that all your valves have suitable valve caps. This will keep valve cores clean and clear and guard against leakage.

REPAIRS - WHENEVER POSSIBLE, SEE A TIRE DEALER AT ONCE. Some tire manufacturers do not warrant any inspection or repair process. The repair is entirely the responsibility of the repairer. Punctures in the tread of a passenger tire which do not exceed 1/4 of an inch (6mm) in diameter can usually be repaired by following the Rubber Manufacturers Association (RMA) Passenger and Light Truck Repair procedures. Contact the manufacturer of your tires for its position and assistance as to the acceptable location for a proper repair and the repair of speed rated tires. Do not use plug repairs. They may cause further damage to the tire. They are not always air tight and the plug may fail. Do not exceed posted speed limits on any repaired tire. Certain tire manufacturers speed ratings are voided if the tire is repaired.

Although a tire was properly repaired, internal structural damage resulting from the puncture may have occurred. Some time later the damage may cause the tire to be removed from service. If the tire has a puncture in the tread which exceeds 1/4 inch (6mm), the tire must be replaced. If any tire has sustained a puncture, have the tire inspected internally by a tire dealer for possible damage that may have occurred.

Improper mounting and inflation procedures can cause an explosion of the tire/rim assembly. Only specially trained persons should perform these tasks. Contact your tire store or dealer for assistance.

CAUTION - Never, under any circumstance, introduce a flammable substance into a tire.

WHEEL ALIGNMENT AND BALANCING
Wheel alignment and balancing are important for safety and maximum mileage from your tires. Check how your tires are wearing at least once a month. If your tires are wearing unevenly, such as the inside shoulder of the tire wearing faster than the rest of the tread, or if you detect excessive vibration, your vehicle may be out of alignment or balance. These conditions not only shorten the life of your tires, but adversely affect the handling characteristics of your vehicle which could be dangerous. If you detect irregular wear or vibration, have your alignment and balance checked immediately. Tires which have been run underinflated will show more wear on the shoulders than in the center of the tread.

HARD BRAKING
You must inspect your tires after any hard braking circumstances or after tires have slid on the pavement. This can cause a flat spot in a section of the tire tread.

TIRE SPINNING
Never spin your tires above a speedometer reading of 35 mph (55 km/h) if your vehicle becomes stuck. The centrifugal force generated by the free spinning tire/wheel assembly may cause a sudden tire explosion, resulting in vehicle damage and/or serious personal injury or death. Never allow anyone to stand near or behind a tire spinning at high speed while attempting to push a vehicle that is stuck. When in mud, sand, snow, ice or other slippery conditions, do not indulge in excessive wheel spin. In such conditions, with automatic transmission vehicles, by accelerating the engine excessively, it is possible to spin one of the drive tires beyond its speed capability. This is also true when balancing a drive tire/wheel assembly using the engine of the vehicle to spin the wheel.

TIRE TREAD
Tires must be replaced when the depth of the tread reaches 2/32 inch (1.6 mm). Tires are manufactured with tread wear indicators molded into

*Provided by and published at the request of the tire manufacturers/warrantors.
the tire grooves which indicate tread wearout. As tires approach 2/32 inch (1.6 mm) wearout, the tread gauge becomes thinner and more vulnerable to the effects of road hazards. Also, worn tires are more subject to hydroplaning, which can cause loss of control. Therefore, visual tire inspection becomes more crucial as the tires wear out.

**WORN TIRES**
Never drive on worn tires. Tires should be replaced by trained personnel when 2/32nds of an inch tread depth remains, as indicated by the tread wear indicators molded into the tread grooves. In most states, it is illegal to drive with less than 2/32nds of an inch of tread remaining.

**TIRE MIXING**
For best performance select tires similar in size and load rating to the original equipment tires. It is recommended that the same size and type of tire be used on all four wheel positions. In certain tires, casing ply material and ply construction may vary as indicated on the sidewall of the tire. When changing or replacing tires, it is preferred that all four tires are the same construction type (i.e., High Performance, All Season, Mud & Snow) and construction (Radial or Bias Ply). Tires which meet the Rubber Manufacturer’s Association (RMA) definition of mud and snow tires are marked M/S, M+S, M&S. On such tires, this designation is molded into the sidewall. Tires without this notation are not recommended for mud and/or snow driving.

Before mixing tires of different types on a vehicle in any configuration, be sure to check the vehicles owner’s manual for its recommendations.

If snow tires are needed, it is necessary to select tires equivalent in size and load rating to the original equipment tires. Always fit performance snow tires in sets of four (4) for optimum mud and snow traction and maintenance of vehicle handling characteristics. If you do not, it may adversely affect the safety and handling of your vehicle. It is also important to check the vehicle owner’s manual before mixing or matching tires on 4-wheel drive vehicles as this may require special precautions.

Please refer to your Owner’s Manual for more information on tire replacement precautions.

**TIRE ROTATION**
Tires on your Infiniti vehicle should be rotated every 7,500 miles or as irregular wear develops. If irregular wear becomes apparent or if the wear rate on the tires is perceptibly uneven, the tires should be rotated in such a way to alleviate the problem. Check your vehicle for any mechanical problems and correct if necessary. Any rotation pattern or procedure may be followed including those indicated in the Owner’s Manual. Some tires have arrows on the sidewall showing the direction in which the tire should turn. When rotating this type of tire, care must be taken to maintain the proper turning direction as indicated by the arrows. Some vehicles have different tire sizes specified for front and rear axles. Tires on these vehicles should be rotated side to side. Where a temporary type spare tire is available, it should not be included in the tire rotation schedule. Such tires are intended for temporary use only. Whenever only two tires are replaced, the new tires should be put on the rear axle of vehicles equipped with the same size tire on all four wheel positions.

**TRAILER TOWING**
If you anticipate towing a trailer, you should see a tire dealer for advice concerning the correct size of tire and pressure. Tire size and pressure will depend on the type and size of the trailer and hitch utilized, but in no case must the maximum cold inflation pressure or the tire load rating be exceeded. Check the tire decal and your Owner’s Manual for further recommendations on trailer towing.

**TIRE ALTERATIONS**
Do not perform any alterations on your tires. Alterations may prevent proper performance, leading to tire damage, which can result in an accident. Tires which become unserviceable due to alterations such as truing, whitewall inlays, addition of balancing or sealant liq-

uids, may be excluded from warranty coverage. Consult your tire warranty.

HIGH PRESSURE TEMPORARY SPARE TIRES

1) The high-pressure spare tire in your Infiniti vehicle is designed for temporary use only and must not be used continually as a regular tire. The standard tire should be repaired and/or replaced as soon as possible.

2) Avoid driving over obstacles that may damage the tire through impact or cutting, such as potholes, glass, metal, etc.

3) Speed must not exceed 50MPH (80km/h) for non-speed-rated temporary spare tires.

4) Temporary spare tires have a limited treadlife which can vary depending on road conditions and your driving habits. The spare tire should be returned to the trunk as soon as the standard tire can be repaired or replaced.

5) Because the high-pressure spare tire was specifically designed for your car, it should not be used on any other vehicle.

6) Do not use snow chains on your high-pressure spare. This could cause damage to your vehicle.

7) Check the tire’s cold inflation pressure monthly and maintain at 60psi (4.2kg/cm²) even when not in use.

8) The high-pressure spare tire should not be used with any other rim nor should standard tires, wheel covers, or trim rings be used on the high-pressure spare tire rim which was originally installed.

9) When the tread wear indicator appears on the tire, replace it only with the same type spare tire.

10) Do not enter an automatic carwash with a temporary spare tire fitted.

11) Do not make a sharp turn or apply the brakes suddenly when driving on a high-pressure temporary spare.

Note: When using any temporary type spare tire, be sure to follow the vehicle Owner’s Manual instructions.

TIRE STORAGE

All tires should be stored in a cool dry place indoors so that there is no danger of water collecting inside them. When tires are stored they should be stored in a cool place away from sources of heat and ozone such as hot pipes and electric generators. Be sure that surfaces on which tires are stored are clean and free from grease, gasoline or other substances which could deteriorate the rubber. (Tires exposed to these materials during storage or driving could be subject to sudden failure.)

TO AVOID DAMAGE TO YOUR TIRES AND POSSIBLE ACCIDENT:

• Check tire pressure at least once a month when tires are cold and before long trips.
• Do not underinflate/overinflate.
• Do not overload.
• Drive at moderate speeds, observe legal limits.
• Avoid driving over potholes, obstacles, curbs or edges of pavement.
• Avoid excessive wheel spinning.
• If you see any damage to a tire, replace with spare and see the tire manufacturer’s dealer or your Infiniti dealership.

INFORMATION SPECIFIC TO YOUR BRIDGESTONE RUN-FLAT TIRES

SAFETY WARNING
When in “run-flat” mode, serious injury or death may result from:
• Tire failure due to excessive operation while running flat.
• Aggressive driving, or driving at speeds greater than 55 mph and/or distances greater than 50 miles.
• Tire failure preceded by vibration. If the vehicle begins to vibrate, gradually reduce speed and stop at a safe location. Tire must be replaced before proceeding.
• Handling tire immediately following run-flat operation. Due to the significant amount of heat generated, allow tire to cool before handling.
• Tire or system failure due to service performed by anyone other than specially trained personnel. For assistance, contact Bridgestone/Firestone at 1-800-847-3272 or your Infiniti Retailer. Call 1-800-662-6200 for the location of your nearest Infiniti retailer.

CARE OF YOUR RUN-FLAT TIRES
Because of the unique, state-of-the-art technology in your run-flat tires, the low pressure warning system, and the Infiniti wheel on which they are mounted, it is important that you return to your Infiniti dealer or Bridgestone/Firestone Certified Run-Flat retailer service center for each of the following:
• Any tire problem.
• Tire rotation.
• Tire replacement. We recommend that you not mix run-flat tires with conventional non-run-flat tires as the handling characteristics of run-flat tires and conventional tires are different. Clearly you will not have the run-flat capability with the conventional tires.
• Any problems with the low tire pressure warning system.

SAFETY WARNING
Your run-flat tires are designed for limited operation in a run-flat mode. The tires are not designed for continual or repeated driving with air pressure below that recommended by Infiniti. In that situation, your tires will get overheated. This can cause premature failure of your run-flat tires that could lead to serious personal injury or death.

TIRE REPAIRS
Your Bridgestone run-flat tires should not be repaired. If they are damaged, they should be replaced by your Bridgestone/Firestone Run-Flat Certified Retailer under the terms of the Bridgestone/Firestone Run Flat Tire Warranty or by your Infiniti Retailer.
