

**Honda Recall Voice Alert to Customer**

**NHTSA ID: 12V-436**

**Date: September 20, 2012**

Honda recently mailed to you an important safety recall notice regarding your 2007 thru 2011 Element. This notice explains that if your vehicle is equipped with a Honda Genuine accessory trailer hitch, a problem potentially exists with the wiring that may cause the turn signals to operate only when the brake is depressed, increasing the risk of crash. The notice also outlines what you need to do, including how to obtain the recall inspection, and if necessary, repair, free of charge, at any authorized Honda dealer. If you need help finding a Honda dealer, or do not receive the notice within five days, please call 1-800-999-1009, and select option 4. Thank you.
