ZAP contracted with R.L. Polk to do a DMV search of all registered MY 2008 vehicles. They Found 459 registered vehicles in the United States. R.L. Polk mailed a recall notice to them on October 8, 2012. We are currently matching our warranty list to R.L. Polks list to identify customers and dealers who have vehicles but are not currently registered, so a recall notice can be sent to them.

3. The Total Number of Items of Equipment Involved: 691 – amended per schedule sent to DOT

The total number of items involved in the subject campaign (including all items sold or distributed to purchasers, dealers, distributors, and similar entities beyond the immediate control of the manufacturer/importer).

Number of Items Returned from Inventory or Remedied Prior to Sale: 51 amended to 62

Includes (a) the total number of items returned from Manufacturer, Distributor, Dealer or Retailer inventory or (b) otherwise remedied prior to sale to consumers.

4. (a) Total Number Inspected & Remedied: 109 /amended to 0

Total number of items which were inspected and/or otherwise repaired or remedied.

ZAP has developed labeling and a dual reservoir for the master cylinder to meet the requirements of this recall. However, in the last update from DOT, the labels did not meet the height requirements or have a permanent fastener for the labeling. ZAP is having the labels reprinted with a permanent adhesive and have placed a purchase order for the dual reservoirs for the master cylinder as required.

These parts will be made available to owners and dealers in the 4th Quarter, 2012. We are amending this amount that we previously stated were remedied and will report in the 4th quarter report the number of remedies mailed to our customers.

(b) Total Number Inspected & NOT REQUIRING REMEDY: 0

Total number of items involved in the recall and inspected, but determined to NOT REQUIRE REMEDIAL or recall repair work.
