

Honda Recall Voice Alert to Customer

NHTSA ID: 13V-092

Date: April 30, 2013

Honda recently mailed to you an important safety recall notice regarding your 2005 Pilot. This notice explains that your Vehicle Stability Assist unit may have been damaged during manufacturing. A damaged VSA system may apply a small amount of braking force even if the driver has not pressed the brake pedal. If the driver applies the brakes during a malfunction, the VSA system may cause the vehicle to come to an abrupt stop, increasing the risk of crash. The notice also outlines what you need to do, including how to obtain the recall inspection, and if necessary, repair, free of charge, at any authorized Honda dealer. If you need help finding a Honda dealer, or do not receive the notice within five days, please call 1-800-999-1009, and select option 4. Thank you.
