Subject: Sheridan Submissions Link Update

Out of nowhere, security alerts issues emerged (from Google?) in the old domain I had been using to share safety information and files. To dispense with that annoyance, I have recently purchased the domain pvsheridan.com and have uploaded the entire file to this new domain.

In general, any prior links that I had sent which were prefaced with the old [REDACTED]” need only be updated in that same string location with pvsheridan.com. For example:

[REDACTED]

becomes

[REDACTED]

In the meantime, most (not-all) of the letters that I have sent regarding EA12-005 are now available at pvsheridan.com (in order of receipt):

[REDACTED]

Paul Sheridan
