BOSCH

TO: Dealer Principal and Dealer Service Manager Nissan

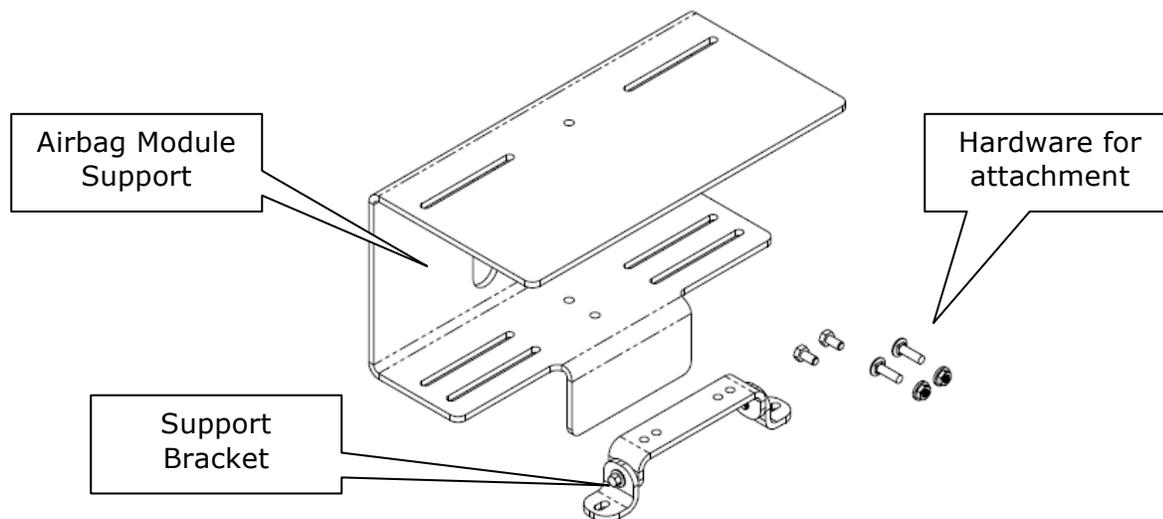

August 2013

The following special service tool has been classified essential by Nissan North America, Inc.

J-51315

Airbag Module Support Kit

Applications: 2001 - 2004 Maxima, Pathfinder, Sentra and future applications

The J-51315 Airbag Module Support kit is utilized during the airbag service procedure per the technical bulletin instructions. Reference the service bulletin for additional information on proper use.

The J-51315 tool will not be invoiced to your Nissan Non-Vehicle Account, in accordance with your dealer agreement with Nissan North America, Inc.

Essential tools are critical to proper vehicle diagnosis, service and repair. For this reason, Nissan's Dealer Sales and Service Agreement Standard Provisions require that Dealers obtain and maintain those tools identified by NNA as essential. Before any tool is designated as essential, Nissan engineering determines the need for the tool, and works closely with TechMate to validate each tool's function on the applied make/model. Additionally, Nissan considers any commercially available tool options prior to every tool release. Actual tool costs are driven by timing requirements, design, materials selected, manufacturing process, and low tool production volumes. Each tool is maintained in TechMate inventory for over ten years after make/model end-of-production.
