

PRODUCT RECALL NOTICE

Dometic 9100 Awning, WeatherPro Awning and Motor Service Kit

June 28, 2013

Dear Valued Customer,

Renegade is committed to providing a quality product for the enjoyment of its customers. Part of this commitment is to work with our suppliers and ensure all components that go into our products operate as intended. As part of this process it has come to our attention that there is a potential condition related to the Dometic 9100 Power Awnings, WeatherPro Awning and Motor Service Kits (complete awnings and/or parts/accessories, included). This potential condition affects only trailer model KIT28TA produced in April 2013.

Background Dometic recently introduced an enhanced redesign of certain components associated with the motor of its 9100 Power Awning, WeatherPro Awning and Motor Service Kits. There is an important step in the installation instructions which in conjunction with the design change cannot be bypassed from the proper sequence.

Condition Through on-going testing it has become apparent that if a specific installation step is bypassed during installation of the awning or motor service kit that the awning motor will become damaged. **If this motor damage occurs it is possible that the awning can unfurl unexpectedly, either while the coach is at rest or while in transit.**

Action Due to this potential condition, which not be evident from post-installation inspection, we are requesting that you **do not drive your vehicle**. Please check the serial number of your awning to see if your unit is in the affected serial number (#306xxxx through #314xxxx). The serial number appears on a label on the right underside of the fabric and on the roller tube. If you have a confirmed affected serial number, please call **1-888-943-4905**. Dometic will provide detailed instructions during this call.

If you have had your awning motor replaced or serviced after April 2013 do not go by your awning serial number to determine if the awning is affected. Instead contact **1-888-943-4905**.

Renegade greatly appreciates your assistance in correcting this potential condition.
