Mr. Jody Blais

Cynthia Glass,
Hello.

We received a letter from you about the Dometic Safety Recall EQ 13-004 / Dometic 13E-019

During this recall period Magnum ordered one (1) Awning with a defective motor for our inventory. Shortly after receiving the recalled part, Dometic issued their recall. Since we still had the awning in Inventory we did a Warranty claim and changed out the bad motor with the recommended motor from Dometic under their warranty. This Awning motor was changed out before it was ever sold to a Magnum client.

No action was needed to contact any of our clients, because none of these recall products ended up with our clients. Hence, we did not believe a report was needed.

Please let me know if you need anything else.
Thank you,
Jody
