SAFETY RECALL 12530

SEPTEMBER 2013

Dear INTERNATIONAL® Customer,

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Navistar has decided that a defect which relates to motor vehicle safety exists in certain ProStar® model trucks built 1 August 2011 thru 10 July 2012 and TranStar® model trucks built 1 August 2011 thru 27 March 2012 with brake feature code 0504501, 0504504, or 04EWM.

REASON FOR THIS RECALL

The brake S-Cam tube bracket assemblies on steer axles may exhibit fractures between the wing bracket and the tube steel.

RISK TO MOTOR VEHICLE SAFETY

The fracture could result in an inoperative brake at the affected wheel end. An inoperative brake may result in an unexpected pull condition during braking application or an unexpected increase in stopping distance and may contribute to a vehicle crash.

DEFECT REMEDY

The repair will involve replacement of the stamped brake spiders with cast brake spiders and the installation of a gusseted S-Cam tube bracket assembly. Dealers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 3 hours to complete.
