

Honda Recall Voice Alert to Customer

NHTSA ID: 13V-260

Date: October 23, 2013

Honda recently mailed to you an important safety recall notice regarding your 2007 or 2008 Fit. This notice explains that your vehicle's power window master switch may not sufficiently prevent water intrusion. Under severe conditions, water may enter the switch, potentially leading to impaired function and overheating, possibly causing smoke, melting or fire. The notice also outlines what you need to do, including how to obtain the recall repair, free of charge, at any authorized Honda dealer. If you need help finding a dealer, or do not receive the notice within five days, please call 1-800-999-1009, and select option 4. Thank you.
