Re: **Grote STT Lamp**
Kenworth Recall No.: 13KWM

Dear Kelly,

PACCAR hereby provides NHTSA updated information regarding the vehicles subject to the above-mentioned recall, for which a 573 report was submitted on December 4, 2013.

Upon further investigation, Kenworth determined that the defect may be present in 5087 vehicles registered in the United States. In our 573 report, we stated that 5503 US-registered vehicles were potentially affected.

The list of potentially affected models should be expanded to include Kenworth C500 trucks built between January 1, 2013 and November 15, 2013.

Please do not hesitate to contact me if you have any questions about this supplemental information or the initial 573 report.

Very truly yours,

s/Pamela S. Tonglao
