

For the majority of vehicles, the inspection and the application of the anti-corrosion compound will be all that is necessary, and that work will take approximately ninety minutes. If, however, the corrosion in the area(s) specified above is so extensive that it is necessary to install new reinforcement brackets, the repairs will take approximately three hours or ten hours, depending on which type of bracket is used. Of course, depending upon the service facility's work schedule and/or the need to have the necessary parts delivered to the service facility, it may be necessary for you to make your vehicle available for a longer period of time.
