RE: NHTSA Campaign # _____
Wilson Trailer Campaign # _____
Notice of Possible Defect

Dear Sir:

Wilson Trailer Company has determined that a possible defect exists in certain Wilson livestock and grain trailers manufactured between October 8, 2013 and July 18, 2014. Wilson Trailer Company was notified by SAF Holland that a defect was identified in pivot bolts in certain CBX Series suspensions shipped to us between October 8, 2013 and November 30, 2013.

This defect is identified as possible cracks between the bolt head and the interface with the bolt body. The presence of the crack could result in separation of the bolt head and failure of the pivot bolt on one side of the axle/ suspension resulting in misalignment of the trailer behind the tractor which would become immediately apparent to the driver.

Your company has sold some of these trailers. Enclosed is a list of your customers and serial numbers for the affected trailers. Wilson Trailer Company will notify these customers per the enclosed Safety Recall Notice. They will be given the option to contact you if they have any questions. I have enclosed the SAF Holland Service Bulletin regarding this inspection and repair. If contacted please answer these questions.

Review the list of customers to confirm that they still own the serial number trailer on your list. If any of your customers have sold or traded the affected trailer, please advise Dan Grote of the new owner and address if available.

SAF Holland will provide the service repair kits at no charge and will reimburse up to two (2) hours per axle for repair. Repair invoices will be sent to Wilson Trailer Company Attention: Warranty Department. The description on the invoice should read "926P Pivot Bolt replacement".

In the event you have any of these trailers on your lot, you will need to inspect and take the action outlined above. I will need to be notified of any such trailers on your lot.

Sincerely

Clarence Dahl
