Recall Number and Description: **13S02 - Left Rear Door Latch Inspection and Repair**

What is the Issue? On your vehicle, the left rear door child lock may have been built incorrectly. As a result, the child lock may not engage when the operator uses normal turning force to activate the child lock, and the operator may incorrectly believe the child lock is engaged. Without the child lock engaged, the door can be opened using the inside door handle. This condition could potentially increase the risk of injury to an unrestrained child.
