

## **IMPORTANT SAFETY RECALL**

NHTSA Recall No. 14V-XXX

Dear Dealer or Service Manager:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Spartan Motors Chassis, Inc. has determined that certain chassis and chassis cabs equipped with a Cummins ISB or ISL engine may contain a safety related defect.

The bond that attaches the filter shell to the filter nut plate may fail. If this occurs, the shell may separate from the fuel filter nut plate, causing the engine to stall without warning and without the ability to restart the engine until the fuel filter is replaced.

An unexpected engine stall with the inability to restart the engine may lead to an increased risk of a crash.

We will contact all owners of these units that are affected by this recall. They will be directed to the appropriate service center for inspection/repair. In addition, we will be coordinating all repair efforts with Cummins, Inc.

**IMPORTANT: Some vehicles may still be in dealer inventory. Federal law requires you to complete the recall remedy on such vehicles before delivery to the retail customer.**
