SAFETY RECALL NOTICE

Date: October 16, 2014

Reference Number: 14V-507

Attn: Jerr-Dan Product Owner

Re: Standard Duty, Medium Duty, Heavy Duty, Multi-Car Carriers, and Standard Duty Wreckers

Subject: Muncie Power Products FR67 Series PTO

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Muncie Power Products (Muncie) has notified Jerr-Dan Corporation (Jerr-Dan) that it has determined that a defect, which relates to motor vehicle safety, exists in certain model year 2009-2014 Standard Duty, Medium Duty, Heavy Duty, Multi-Car Carriers, and Standard Duty Wrecker vehicles manufactured July 2010 through November 2013. The defect could exist in Muncie's FR67 Power Take Off (PTO) unit installed on 2009-2014 Ford F350-550 chassis with 6.8L gasoline engines. Muncie reported that the PTO's pressure switch can see high temperatures on this application that may cause the internal diaphragm to seep transmission fluid out of the switch's screw in the side of the body. Over time, oil seeping from the PTO pressure switch, if exposed to an ignition source, could result in a fire. This Recall must be completed on all affected units.
