

# IMPORTANT SAFETY RECALL

December 2014

This notice applies to your vehicle, **VIN:** \_\_\_\_\_.

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain fuel transfer pumps used in service for various vehicles, equipped with a 6.6L diesel engine and dual fuel tanks. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

## IMPORTANT

- Your vehicle is involved in safety recall 13421.
- Schedule an appointment with your Chevrolet or GMC dealer.
- This service will be performed for you at **no charge**.

General Motors recently discovered a data system issue which may have caused some current owners of vehicles -- that were originally purchased by fleet buyers in the U.S. and Canada -- to not receive certain recall communications from GM. This issue may have prevented prior letters concerning this recall from reaching you, which is why you are receiving this letter. We have corrected our data system and apologize for any delay in providing this letter to you.

In cooperation with the National Highway Traffic Safety Administration (NHTSA) we recommend that you check your vehicle identification number periodically at the GM recall website (<https://recalls.gm.com>) or at NHTSA's website (<https://vinrcl.safercar.gov/vin/>), where you can find the most up-to-date recall information for your vehicle.

### Why is your vehicle being recalled?

Our records indicate that your vehicle may have been serviced with, or you may have purchased, a recalled fuel transfer pump. The fuel transfer pump, which moves fuel from the rear tank to the front tank, may malfunction. This malfunction could cause the fuel gauge to indicate an inaccurate reading, illuminate the Service Engine Soon lamp, reduce engine power, prevent the vehicle from starting, or cause the vehicle to stall. If the vehicle stalls, it could increase the risk of a crash.

### What will we do?

Your dealer will inspect the manufacture date of the fuel transfer pump and, if necessary, replace the pump. This service will be performed for you at **no charge**. Because of service scheduling

requirements, it is likely that your dealer will need your vehicle longer than the actual inspection and, if necessary, replacement time of approximately 30 minutes.

**What should you do?**

You should contact your dealer to arrange a service appointment as soon as possible.

**Did you already pay for this repair?**

Even though you may have already had this condition corrected, you will still need to take your vehicle to your dealer for an inspection. If you have paid for repairs for the recall condition, please complete the enclosed reimbursement form and present it to your dealer with all required documents. Working with your dealer will expedite your request, however, if this is not convenient, you may mail the completed reimbursement form and all required documents to Reimbursement Department, PO Box 33170, Detroit, MI 48232-5170. The completed form and required documents must be presented to your dealer or received by the Reimbursement Department by June 30, 2015, unless state law specifies a longer reimbursement period.

**Do you have questions?**

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
