New Safety Recall Advanced Communication – R05012815

FCA US LLC (Chrysler) announced a safety recall on certain 2014 and 2015 model year (KL) Jeep Cherokee vehicles.

The above vehicles may experience a side curtain airbag and seat airbag unwanted deployment. These vehicles can achieve vehicle angles during off-road driving events which may exceed the Occupant Restraint Control (ORC) module rollover calibration thresholds.

Chrysler will conduct a voluntary safety recall on all affected vehicles to reprogram the ORC module with new software that contains revised rollover thresholds.

NOTE: These vehicles are fully compliant with Federal Motor Vehicle Safety Standard (FMVSS) 226 – Ejection Mitigation.

Dealers will be notified of the launch of this recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
