IMPORTANT SAFETY RECALL

NHTSA RECALL CAMPAIGN

RE: 
21QB Frelander Motor Home

Dear Coachmen Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

The Coachmen RV Class C Division of Forest River Inc. has decided that there is a non-compliance issue which relates to vehicle safety associated with the motor home indicated by the VIN listed above.

SAFETY DEFECT

On certain Frelander and Leprechaun models manufactured on the Ford 158" wheelbase chassis with the 5.4L V-8 engine, the Forest River Federal Certification label located in the driver's door jamb may not contain the correct chassis GVWR, GAWR, and cargo carrying capacity information. This could lead to the vehicle being overloaded, which could result in poor vehicle handling and performance, increasing the risk of a crash causing injury and/or property damage.

REPAIRS

Updated labels containing the proper information and installation instructions will be mailed to the owners of the affected vehicles. Remove the incorrect Certification and Tire and Loading Information labels, clean surface with isopropyl alcohol or non-residue cleaner and replace with updated labels in the proper position.

If you have paid to have this or a similar service performed prior to receiving this notice you can receive a full refund for the repair. Please forward the original paid invoice or receipt to Coachmen RV Plant 210 Service, PO Box 30, Middlebury, IN 46540.
