Dear Mr. Neff:

This letter is to inform you that the Office of Defects Investigation (ODI) of the National Highway Traffic Safety Administration (NHTSA) has opened Engineering Analysis EA15-003 to investigate allegations of interference between the center console driver's side lower finisher panel and/or the HVAC duct forward of the finisher panel with the driver's right shoe when the driver is attempting to release the accelerator pedal, allegedly resulting in delayed brake application and sometimes brief incidents of unwanted acceleration as the driver tries to free their foot in certain model year (MY) MY 2013 through 2015 Nissan Versa Sedan and Versa Note vehicles manufactured by Nissan, and to request certain information.

This office has received 17 reports of interference between the center console driver's side lower finisher panel and/ or the HVAC duct forward of the finisher panel with the driver's right shoe when the driver is attempting to release the accelerator pedal, allegedly resulting in delayed brake application and sometimes brief incidents of unwanted acceleration as the driver tries to free their foot in certain MY 2013 - 2015 Nissan Versa Sedan and Versa Note vehicles. A copy of each of the reports will be sent to you via email.

Unless otherwise stated in the text, the following definitions apply to these information requests:
