## **New Safety Recall Advanced Communication – R32070215**

FCA US LLC announced a safety recall on certain 2011 through 2015 model year (JC) Dodge Journey vehicles equipped with a 2.4L engine.

Some of the above vehicles may have engine beauty covers that could detach from the engine and come in contact with the catalytic converter. If the engine beauty cover remains in contact with the catalytic converter, underhood smoke and/or a fire may occur without warning.

FCA will conduct a voluntary safety recall on all involved vehicles to install a revised engine beauty cover mounting system.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
