Attention: Mazda Service Managers

Subject: Warranty Claims for Safety Recall 8114L – Passenger Air Bag Inflator Replacement

All 2004-2006 model year B-Series trucks nationwide are currently included in Safety Recall 8114L – Passenger Air Bag Inflator Replacement. Mazda will soon open a new recall in order to separate B-Series vehicles from the other models, which are limited to high absolute humidity states.

To prepare our systems for the new recall, the Warranty System will stop accepting claims for B-Series trucks under the 8114L recall on **Friday, July 10, 2015**. We urge you to enter all B-Series recall 8114L claims for vehicles you already repaired prior to that day to avoid delayed claims processing and payment. **Recall 8114L warranty claim processing for all other models will not be affected.**

**Continue to perform recall 8114L for your customers** and hold the claims until we launch the new recall campaign mid-July, when the Warranty System will accept B-Series passenger air bag replacement claims for the new recall. You will receive more information on the recall expansion, including warranty claim processing information by July 17.
