Recall Number and Description: 11S25 - Torque Converter Replacement

What is the Issue?

It may be possible for your vehicle to lose forward and reverse power while driving, due to worn splines in the transmission torque converter. If this occurs, the engine continues to run, steering and braking are unaffected, and the vehicle's electrical system and directional signals remain functional. The transmission's park system also remains fully functional. However, this condition results in a sudden loss of motive power with no warning, increasing the risk of a crash.

What Are We Asking You To Do?

Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps and driving instructions.

The vehicle owner is responsible for having this service action performed. Ford Motor Company reserves the right to deny coverage for any vehicle damage that may result from failure to have this recall performed on a timely basis. Therefore, please have this recall performed as soon as possible.
