

To determine the need for the riser kit, please inspect your trailer as noted below. If your trailer does not meet the minimum of 2.500 (2-1/2 inches) around the tire, please contact your service manager.

The measurement is taken from the crown of the tire to the outside of the trailer fender.

**Please contact your service manager if the measurement is less than 2-1/2 inches.**

Shown above is the point of reference for dimension.  
From the highest point of tire (Crown) to the outside of fender.
