This is a copy of your Report to the U.S. Consumer Product Safety Commission submitted on 7/14/2015

Incident Details	VQ-10735213-5714
------------------	------------------

Document Number: H1570077A

Report Number: 20150714-1F64B-1496342

Report Submitted Date: 7/14/2015

Who You Are: Consumer

Incident Description: On 07/03/15 the consumer drove his truck with the utility trailer attached for about 20 miles. The consumer had taken his lawn mower to Lowes. When the consumer returned home he noticed that the fuse in his truck and the utility trailer had blown out. The consumer examined the utility trailer and noticed the wiring is not safe. The consumer states the wiring is a quick connect and that kind of wiring is not suitable for outdoor use because it cannot get wet. The consumer states the utility trailer is a replacement because the original utility trailer purchased also had defective wiring. The consumer received the replacement from Lowes on the same day, 07/03/15. The consumer has requested Lowes to provide him with a second replacement.

The consumer contacted 3M Corporation (800-494-3552) and spoke with the electrical department to consult about the wiring on the utility trailer. The consumer was told that the quick connect is not appropriate for a utility trailer since they are not waterproof.

The consumer states the wiring is the same on multiple utility trailers manufactured by the firm. The consumer believes the wiring on the utility trailer is dangerous and should be recalled. The consumer plans to contact the firm and express his safety concerns.

Incident Date: 7/3/2015 This is an estimate

Incident Location: Home/Apartment/Condominium - [REDACTED], Farmville, Virginia [REDACTED], United States This is my home address
