Subject: **Stop Sale G650 GS and GS Sertao**

Effective Immediately

There is a Stop Sale in effect for all G 650 GS and GS Sertao (R13/40).

A recall for model years 2013-2015 G 650 GS and G 650 GS Sertao will be announced shortly. This recall involves the engine control software which regulates the idle speed. If the clutch lever is engaged and the throttle is closed with the engine operating at idle speed the engine may stall. The reported engine stalling typically occurs shortly before the motorcycle is brought to a stop. Reprogramming the engine control module of the affected bikes will be necessary.

A list of affected vehicles is attached to this notice. If a unit is in your inventory it should not be sold until the recall action is performed. Existing customer will be notified by a letter from BMW Motorrad USA. Further instructions will be issued shortly via a Service Bulletin.

We apologize for this inconvenience,

BMW Motorrad USA.
