IMPORTANT SAFETY RECALL

NHTSA Recall No.: 15E-070

Dear Nitrous Owner or Reseller:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Holley Performance Products Inc. ("Holley") has decided that a defect which relates to motor vehicle safety exists in certain Nitrous Oxide Systems (NOS) solenoid valves that were manufactured by Peter Paul Electronics Co., Inc., (Peter Paul). There is a possibility that the solenoid valve can fracture when the fuel system is pressurized. If the valve fractures, portions of the valve may become projectiles, increasing the risk of injury to those nearby or possibly damaging other nearby components.

The defective solenoid valves were a part of certain solenoids and NOS kits sold by Holley and are used with nitrous oxide systems in certain automotive applications. All of the below listed kits and related accessories are sold and distributed under the NOS brand name. This recall is being conducted by Holley based on information provided to us by Peter Paul.

Attached is a full listing of all affected part numbers sold by Holley under the NOS brand. All solenoids sold under these part numbers/product names, whether sold in kit form or individually, which were purchased from Holley from May 1, 2015 thru August 17, 2015 are subject to this recall.

WHAT WE WILL DO

We are currently working with our suppliers and retailers to coordinate the return and repair or replacement of the defective products. If you are currently in possession of any of the listed defective products, we will replace them at no charge to you.

WHAT YOU SHOULD DO

Please call 1-800-638-0032, select the option for Customer Service Department, and request a Returned Material Authorization (RMA) number and return instructions. Any of the listed solenoids and solenoid kits purchased within the affected date range (May 1, 2015 through August 17, 2015) should be returned immediately. Parts still in their original packaging should show a Julian date code on the UPC label in the range from **121 15** through **229 15**.

If you follow these instructions but are still not able to have the defective product remedied without charge and within a reasonable time, you may wish to write the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Ave, SE, Washington, DC 20590, or call the Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or go to <http://www.safercar.gov>.

Sincerely,

Holley Performance Products Inc.
