**Date:** Friday, December 19, 2014 1:30:04 PM

---

Frank,

Please find Ford Motor Company's (Ford's) update for programs 14V-343 and 14V-787, in response to Mr. David Friedman's October 29, 2014 written request:

As of December 19, 2014, 26 Ford GT vehicles and 5,004 Ford Mustang vehicles have been serviced. Recovered parts are either at or in-transit to Takata.

Ford understands that Takata began testing recovered Ford inflators on November 20, 2014, and has tested approximately 78 inflators from Ford vehicles with no issues identified.

Please note that Ford offices are closed from December 24, 2014 through January 4, 2015. You and your staff have contact information for key Ford personnel should the need arise.
